CONTENTS

Chapter		Page
	ABSTRACT	1
I	INTRODUCTION	5
II	REVIEW OF LITERATURE	11
	Iron : Biological Essentiality	12
	Iron Absorption and Regulation	15
	Dietary Iron Requirements	22
	The Concept of Bioavailability	26
	Methods for Estimating Iron Bioavailability	28
	Formation of Iron Complexes and their Solubility	39
	Dietary Factors Affecting Iron Availability	41
	Prediction of Iron Availability: Recent Advances	94
III	MATERIALS AND METHODS	97
	Phase I - Further validation of the in vitro method	97
	Phase II - Dose effect of enhancers and inhibitors in the pure system ($FeCl_3$ Solution)	98
	Phase III - Interaction effect of enhancers and inhibitors in the pure system; Developing regression equation no.1	107
	Phase IV - Dose effect of enhancers and inhibitors in the standard meal (STD meal)	110
	Phase V - Interaction effect of enhancers and inhibitors in the standard meal; Developing regression equation no.2	119
	Phase VI - Application of the regression equations no.1 and no.2 to ten typical Indian meals	121

	Chemical Analysis	126
	Statistical Analysis	150
IV	**RESULTS AND DISCUSSION**	152
	RESULTS	152
	Phase I - Validation of the vitro method	152
	- Nutrient compositon of the meals	153
	Phase II - Dose effect - pure system	158
	Phase III - Interaction effect - pure system	163
	Phase IV - Dose effect - STD meal	166
	Phase V - Interaction effect - STD meal	177
	Phase VI - Nutrient composition of the meals	181
	- Application of the two predictive models	183
	DISCUSSION	191
	Nutrient Composition of the meals (Phase I & Phase VI)	191
	In vitro availability of iron vs in vivo iron absorption (Phase I)	195
	Effect of enhancers and inhibitors on iron availability (Phase II, III, IV, & V)	196
	Evaluation of the predictive models (Phase VI)	219
	Limitations of the model	221
	Practical implications	222
V	**SUMMARY AND CONCLUSION**	224
	BIBLIOGRAPHY	230
	APPENDICES	246
