

LIST OF TABLES

Table	Title	Page
2.1	Flash Points and Burning Behaviour of Various Textile Fibres	6
2.2	Ignition Time Data	12
2.3	Flame Temperature of Double Layer Fabrics (Horizontal Burning)	15
2.4	Fibre Ignition Temperatures of various fibres	20
2.5	Heat Generation Capacity of Different Textiles	23
2.6	Commonly Practiced Testing Standards in India	28
2.7	Commonly Practiced Testing Standards in the World	29
3.1	Criterion for Degree of Injury	34
3.2	Thermal Properties at Various Layers of Skin	35
4.1	Fire Related Data showing Accidental Death in India	41
4.2	Losses of Property/Human Lives due to Fire Accidents in Tamilnadu	41
5.1	Stoll and Chianta 2 nd Degree Burn Criteria	67
6.1	Specifications of Fabrics used for the Burning Behaviour Study	76
6.2a	Percentage of TBSA Covered by Saree Normal Pattern	77
6.2b	Combinations of fabrics for Normal Saree Wearing Pattern	78
6.2c	Specimens of Saree/ Supporting Garments depending on Wearing Pattern	79
6.2d	Various Combinations of Supporting Garments with Saree	80
6.3	Time for Ignition (s) for Saree along with Supporting Garments	81
6.4	Thermal Parameters Measured at BHPT for Nylon Saree (SA1) along with Supporting Garments	130
6.5	Thermal Parameters Measured at BHPT for P/C 33/67 Saree (SA2) along with Supporting Garments	133
6.6	Thermal Parameters Measured at BHPT for P/V 67/33 Saree (SA3) along with Supporting Garments	136
6.7	Thermal Parameters Measured at BHPT for P/V 33/67 Saree (SA4) along with Supporting Garments	140
6.8	Thermal Parameters Measured at BHPT for P/C 67/33 Saree (SA5) along with Supporting Garments	143
6.9	Thermal Parameters Measured at BHPT for Polyester Saree (SA6) along with Supporting Garments	146
6.10	Thermal Parameters Measured at BHPT for Cotton Saree (SA7) along with Supporting Garments	150
6.11	Thermal Parameters Measured at BHPT for P/C Saree (SA8) along with Supporting Garments	153
6.12	Thermal Parameters Measured at BHPT for P/V Saree (SA9) along with Supporting Garments	156
7.1	Loom Particulars and Fabric Specifications	210
7.2	Actual Pick Density of Fabric with Different Weaves (Picks per inch)	210
7.3	Dyeing Particulars of Samples	211
7.4	Effect of Weave, Pick Density and Type of Dye on Mass of Fabric	212
7.5	Effect of Weave, Pick Density and Type of Dye on Burning Behaviour of Fabric	213
7.6	Effect of Fabric Weave, Pick Density and Type of Dye on AIHF Values of Fabric	214
8.1a	Specification of Fabrics Used for Thermal Tests on Exposure to Various Aftercare Practices	223
8.1b	Various Types of Specimen Prepared Using Different Combinations of Aftercare Practices	223
8.2	Fabric Mass (gsm) of Finished Fabrics and After Wash Cycles	226
8.3	Effect of Washing Cycles on AIHF values	227
8.4	Combined Effect of Washing Cycles and Ironing on Fabric Mass	227
8.5	Combined Effect of Number of Washing and Ironing on Incident Heat Flux Values	227
8.6	Effect of Number of hours of Light Exposure on Fabric Mass	228
8.7	Effect of Number of hours of Light Exposure on AIHF	228
8.8	Effect of Low and High concentration Blueing on Cotton Fabric	228
