

List of Tables

	Page
1.1 Timing and nature of C ₄ grass expansion in different areas	5
2.1 Carbon and oxygen isotope ratio measurements of Z-Carrara (ZC-2002) through time	41
2.2 Carbon and oxygen isotope ratio of old Z-Carrara	42
2.3 Carbon and oxygen isotope ratio of MMB	42
2.4 Hydrogen isotope ratio of IAEA OH-6 and Kaolinite standard	42
3.1 Carbon and oxygen isotope ratio of soil carbonate and carbon isotope ratio of associated organic matter from individual soil profile from Ranital Section of Kangra Valley	48
3.2 Carbon and oxygen isotope ratio of soil carbonate and carbon isotope ratio of associated organic matter from Ranital, Kotla and Haripur Khol section	49
3.3 Carbon isotope ratio difference between soil carbonate and matter associated soil organic	52
4.1 Carbon and oxygen isotope ratio of DCCN from Mohand Rao and Haripur Khol sections	69
4.2 $\delta^{13}\text{C}$ and $\delta^{18}\text{O}$ of SCN and $\delta^{13}\text{C}$ of organic matter associated with SCN from Mohand Rao	69
4.3 Timing and nature of change in vegetation and timing of rainfall pattern change in different Siwalik sections	82
5.1 Hydrogen isotope ratio of bulk pedogenic clays and abundance of different clay species	89
6.1 Carbon and oxygen isotope ratio of soil carbonate and carbon isotope ratio of associated organic matter from individual soil profile of Siwalik and Gondwana	109
6.2 Carbon and oxygen isotope ratio of soil carbonate and carbon isotope ratio of organic mater from different sections of Denwa and Bagra Formation	110
6.3 Estimated CO ₂ from Gondwana and Siwalik palaeosols	111
7.1 Carbon and oxygen isotope ratio of carbonate cement from sandstone	125
