

## LIST OF PLATES

Plate No		After Page No
3.1	: IRS FCC image (Band 4) of Mahi basin and adjoining areas, showing major geomorphic features.	27
3.2	: Panoramic view of Hogback ridge trending NNE-SSW near Santrampur.	28
3.3	: Hogback ridge showing escarpment near Kadana.	28
3.4	: View of older aggradational surface showing deep ravines near Singrot.	31
3.5	: Panoramic view of S1 and S2 surfaces at Kothiyakhad.	32
4.1	: Close-up view of the slickensides on the exposed face of silty-sand unit at Kadana.	46
4.2	: Folded calcrete layers in stratified sand at Rayka.	46
4.3	: Slump structures in the calcretised sandy silts at Rayka.	47
4.4	: Conjugate fractures trending NNW-SSE and ENE-WSW in trough cross-stratified calcrete conglomerate near Singrot.	47
5.1	: Planar cross-stratified conglomerate at Poicha.	58
5.2	: Pseudo-anticlines in the vertisols at Rayka.	58
5.3	: View of sediment succession at Shihora overlying the Deccan Traps.	59
5.4	: View of sediment succession exposed in the right bank at Singrot.	59
5.5	: NW trending stabilized dune at Devpura.	61
5.6	: Pseudo-stratified sediment succession at Vanoda.	61
5.7	: Channel-fill deposits at Dahevan.	64
5.8	: Sediment succession at Mohammadpura.	64
5.9	: Rubified silts at Dabka	65
5.10	: Sediment succession at Kothiyakhad.	65
5.11	: Sediment succession at Rayka	70
5.12	: Sediment succession at Sili.	75
6.1	: Close-up view of co-sets in the Gp-lithofacies showing well-rounded quartzitic clasts at Kadana.	84
6.2	: Gp-facies at Rayka.	84
6.3	: Photomicrograph of sub-rounded feldspar (orthoclase) and carbonate nodules in a micritic groundmass.	
6.4	: Photomicrograph of a sub-angular sillimanite grain and carbonate nodules.	85

6.5 :	Photomicrograph of sub-rounded basaltic rock fragment and corroded quartz cemented by sparry calcite.	85
6.6 :	Photomicrograph showing sub-rounded quartzitic grain and carbonate nodules.	85
6.7 :	Photomicrograph showing cross-hatched microcline surrounded by sparry cement.	92
6.8 :	Photomicrograph showing sub-rounded to rounded carbonate nodules.	92
6.9 :	Horizontally laminated silty-sand facies (Fl) at Kothiyakhad.	94
6.10 :	Planar cross-stratified sand facies (Sp) showing herringbone structure at Kothiyakhad.	94
