

ACKNOWLEDGEMENT

I owe my sincere gratitude to Dr. Shyama Rajaram, for her support, guidance, insight and opinions during this process. She has been responsible for directing my thoughts from the conceptualization of my topic to ably supervising me in channelizing these thoughts into concrete results. Her advice has helped me immensely in many facets of my work and life.

This research became feasible due to the generosity and trust shown by Walt Crawford in sharing his list of blogs from his book 'The Liblog Landscape 2007-2010 (2011)' with me, for which I will be forever indebted.

I would like to thank my colleague Dr. Sanghamitra Pradhan for her sincere and valuable suggestions given for my work.

I wish to thank my brother Heman Gala for helping me in procuring books and reading materials and for guiding me patiently with computing skills at times.

I am deeply grateful to my parents Pushpa and Krishnakant Gala for supporting me in my educational endeavor, silently taking care of my responsibilities for the past three years from the coursework to the writing of the thesis.

I thank my husband Ranjan for motivating me to undertake this path. I would also like to thank my daughter Ira for having shown the understanding at her age to allow her mother to pursue her goals.

I appreciate the words of encouragement given to me by my friends Renuka Singru-Krajewski, Binal Shah Desai, Anjana Amin, Anita Pillai, Hiral Patel, Kavitha Iyer, and Nidhi Shendurikar Tere.

- Bhakti Gala
