

A C K N O W L E D G E M E N T

The author takes this opportunity to express his deep sense of gratitude to Prof.S.S.Merh, Head of the Department of Geology, M.S.University of Baroda for supervising and guiding this research work. But for his constant encouragement the author would not have been able to complete this thesis.

The author is very much indebted to Sarvashri L.R.Dalal, Chief Secretary, Government of Gujarat, J.P.Naegamvala, Chief (Irrigation & Power), Planning Commission and former Chief Engineer, N.K.Patel, Retired Chief Engineer, and C.C.Patel, Chief Engineer, Public Works Department, Government of Gujarat, for their keen interest in his research work and for their all round encouragement.

The author's grateful thanks are due to Shri R.B.Kothi, Chemist of a private firm for his valuable help in supplying data of chemical analyses of various limestone samples as well as discussing problems of cement industry. His thanks are also due

to Shri P.P.Patel, a colleague for a considerable help in preparation of drawings, getting photographs, etc.

Lastly, the author wishes to thank Sarvashri V.V.Kulkarni and M.H.Gandhi, who very kindly agreed to type this thesis and did an excellent job of it.
