

List of Figures

Sr. no.	FIGURES	Page no
1	Figure 1.1: Distribution of major cancer incidences and major cancer mortality found amongst women	6
2	Figure 1.2: Breast cancer incidences in India	7
3	Figure 1.3: Schematic representation of molecular subtypes of breast cancer	8
4	Figure 1.4: Tumor microenvironment in breast cancer	12
5	Figure 1.5: Overview of TNF-α relevance in breast cancer progression	19
6	Figure 1.6: Holistic approach against cancer progression.	32
7	Figure 1.7: Innovative approaches for cancer treatment	44
8	Figure 3.1: Authentication record of <i>Bauhinia variegata</i> Linn leaves.	50
9	Figure 3.2: Authentication certificate of <i>Bauhinia variegata</i> Linn leaves.	51
10	Figure 3.3: Soxhlet extraction setup used for extraction of phytocomponents from <i>B. variegata</i> leaves.	52
11	Figure 3.4: Lyophilizer used for the lyophilisation of the aqueous extract	52
12	Figure 4.1: Documented distribution of <i>Bauhinia variegata</i> throughout world	61
13	Figure 4.2: <i>Bauhinia variegata</i> tree and leaves	62

14	Figure 4.3: Percentage scavenging of DPPH free radical with different extracts of <i>Bauhinia variegata</i> L	66
15	Figure 4.4: Anti-proliferative activity of <i>Bauhinia variegata</i> extracts towards breast Cancer cell-lines MCF-7 and MDA-MB-231	68
16	Figure 4.5: HRLC-MS chromatogram of <i>B. variegata</i> L. aqueous extract	71
17	Figure 4.6: The molecular structures of major compounds from <i>B. variegata</i> L. aqueous extract	71
18	Figure 4.7: HRLC-MS analysis of standards	74
19	Figure 4.8: TLC analysis of aqueous extract of <i>Bauhinia variegata</i> L.	75
20	Figure 4.9: Thin Layer Chromatography of aqueous extract fractions of <i>Bauhinia variegata</i> L.	77
21	Figure 4.10: FTIR spectra of aqueous extract of <i>B. variegata</i>	78
22	Figure 4.11: Cytotoxicity assay of standards against breast cancer cell lines	80
23	Figure 4.12: Cytotoxicity assay of fractions of aqueous extract of <i>B. variegata</i> leaves against breast cancer cell lines	81
24	Figure 5.1: schematic diagram of 3D spheroids	91
25	Figure 5.2: The effect of aqueous extract on wound healing ability in breast cancer cell lines	95
26	Figure 5.3: Cell Migration Assay in breast cancer cell lines	98

27	Figure 5.4: Formation of Spheroids by Hanging Drop method in breast cancer cells	99
28	Figure 5.5: The effect of <i>Bauhinia variegata</i> aqueous extract on MCF-7 Spheroids	101
29	Figure 5.6: Cell invasion in MCF-7 spheroid	102
30	Figure 5.7: Timeline for the spheroids subjected to aqueous extract of <i>Bauhinia variegata</i> leaves	103
31	Figure 5.8: The aqueous extract affects clonogenicity of breast cancer cell lines	105
32	Figure 5.9: The effect of aqueous extract on cell proliferation in absence and presence of TNF-α in MCF-7 for 24 hours	106
33	Figure 5.10: The effects of aqueous extract on cell proliferation in MCF-7 spheroids	109
34	Figure 5.11: Effect of aqueous extract of <i>Bauhinia variegata</i> leaves on cell area in absence and presence of TNF-α and estradiol in MCF-7 spheroids	111
35	Figure 5.12: The effect of aqueous extract of <i>Bauhinia variegata</i> leaves on cell perimeter in absence and presence of TNF-α and estradiol in MCF-7 spheroids	113
36	Figure 6.1: TNF- α regulates a complex signalling network for a maintaining a balance between cell death and cell survival.	121
37	Figure 6.2: Dual role of ROS in tumorigenesis.	124
38	Figure 6.3: Morphological changes in breast cancer cell lines (MCF-7 and MDA-MB-231)	126

39	Figure 6.4: Effect of aqueous extract and compounds on ROS level in MFC-7 and MDA-MB-231	128
40	Figure 6.5: Mitochondrial transmembrane potential by TMRM Assay in MCF-7 and MDA-MB-231cells in presence and absence of TNF- α	133
41	Figure 6.6: Cell death analysis by Annexin V - PI in breast cancer cell lines exposed to aqueous extract of <i>B. variegata</i> L. and different standards	140
42	Figure 6.7: Effect of aqueous extract was analysed on PARP, Caspase 8 and Bcl2 in breast cancer cell lines	142
