

LIST OF TABLES

Table no.	Title	Page no.
2.1.1	Classification of Sports according to Energy Expenditure	17
2.2.1	Body Fat percentage among reference population	18
2.2.2	Body Fat percentage and its classification among reference population	18
2.2.3	Body Fat percentage of the athletic population	18
2.3.1	Daily carbohydrates recommendations	21
2.3.2	Daily protein recommendation	24
2.3.3	Average Body Weight and Energy Expenditure Levels Assumed and Allowance Suggested	25
2.3.4	Summary of Nutritional Requirements of Athletes- Before, During and After Exercise	26
2.4.1	Functions and usage of Vitamins and Minerals with regard to exercise	27
2.5.1.1	Symptoms and consequences of Dehydration	30
2.5.1.2	Fluid replacement guidelines	30
2.5.2	Electrolyte requirements for athletes	31
2.9.1	Classification of Processed foods	37
2.11.1	List of countries following mandatory and voluntary food labelling regulations	46
2.11.2	Criteria used in the Color-coded Traffic Light System for Classifying Nutrients as Low (Green), Medium (Amber) or High (Red) for foods	50
2.11.3	Criteria used in the Color-coded Traffic Light System for Classifying Nutrients as Low (Green), Medium (Amber) or High (Red) for Beverage	50
2.11.4	Recommended GDA for various nutrients	51
3.2.8.1	SAI football skill test scoring table	60
3.2.8.2	Health Norm Ranges for the 90 degree Sit and Reach Test	61
3.2.8.3	Step up test score	62
3.2.10	Body composition classification	64
3.2.11	Tools and Techniques (Phase-I)	64
3.2.1.1	Processed Packaged foods examined for food labelling	67
3.3.1.1	Knowledge index on various components of food labels.	70
3.3.1.2	Knowledge index on (GDA) labelling scheme	70
3.3.1.3	Classification and category of KAP and (GDA) labelling scheme scores	70
4.1.1.1	Socio-demographic characteristics of the subjects	76
4.1.2.1	Duration and level of participation in football competition of the total subjects	77
4.1.3.1	Mean values of anthropometric measurements of total subjects	78
4.1.3.2	Percentage of total subjects showing their nutritional status as BMI classification (in percentage)	78
4.1.4.1	Mean value of the fitness test of football players	79
4.1.4.2	Classification of subjects on the basis of fitness test	79
4.1.5.1	Mean value of the body composition of football players	82
4.1.5.2	Comparison between 30 metre fitness test and Body Composition	83
4.1.5.3	Comparison between Juggling fitness test and Body Composition	83
4.1.5.4	Comparison between kicking fitness test and Body Composition	83
4.1.5.5	Comparison between Step fitness test and Body Composition	84
4.1.5.6	Comparison between Flexibility fitness test and Body Composition	84
4.1.5.7	Correlation between various parameters like Age, BMI and fat	85
4.1.6.1	Mean score values of factors affecting food choice during purchasing processed packaged products of total subjects	85
4.1.6.2	Percentage distribution of factors affecting food choice during	86

	purchasing processed packaged products among total subjects	
4.1.7.1	Mean intake of nutrients of subjects as per 24 hour dietary recall	88
4.1.7.2	Percent distribution of calories from Macronutrients intake of the football players (in percentage)	89
4.1.7.3	Percentage of football players belonging to different age-groups showing percent RDA	89
4.1.8.1	Mean score of Food Frequency for most commonly consumed processed foods among the football players	90
4.1.8.2	Distribution of Frequency consumption of Processed Packaged Foods among football players N=250	91
4.1.8.3	Frequency consumption of Processed Packaged Foods among football players N=250	92
4.1.8.4	Amount of processed foods consumed as per frequency among football players	93
4.2.1.1	Categorization of processed packaged foods examined for food labelling	99
4.2.1.2.a	Types of Nutrition Facts Panel	100
4.2.1.2.b	Mandatory nutrients on NFP in percentage in various food groups	112
4.2.1.2.c	“Basic 5” and “Other important 7” nutrients on NFP in percentage in various food groups	113
4.2.1.2.d	Processed packaged foods high in Energy and Fat as per USDA criteria in processed packaged foods in percentage in various food groups	114
4.2.1.2.e	Criteria for foods to be considered high in Fat, SFA, Sugar and Salt as per UK-FSA criteria	115
4.2.1.2.f	Food products reporting Low, medium or high content of Fat, SFA, Sugar and Salt as per UK-FSA criteria in various food groups (in percentage)	116
4.2.1.4	Types of allergen declaration on nutrition label in various food groups (in percentage)	119
4.2.1.6	Symbols and Logos on nutrition labels in various food groups (in percentage)	122
4.2.1.7	Types of formats of Manufacture and Best Before Date on nutrition label in various food groups (in percentage)	123
4.2.2.1	Classification of sports supplements under study	124
4.2.2.2a	Brands surveyed for the sports supplements under study	126
4.2.2.2b	Types of Nutrition Facts Panel displayed on sports supplements	127
4.3.1	Reasons for consumption of processed packaged foods among football players (in percentage)	130
4.3.2	Percentage of frequency of reading Food labels, Ingredient list, Nutrition Facts Panel and quality symbols among football players (in percentage)	131
4.3.3	Reported reasons for examining Food labels among football players (in percentage).	132
4.3.4a	Reported reasons for not examining Food labels among football players (in percentage).	132
4.3.4b	Reported reasons for not understanding Food labels among football players (in percentage).	133
4.3.5	Reported common factors considered while purchasing processed packaged foods by football players (in percentage).	133
4.3.6	Type of information looked on NFP while purchasing processed packaged products by football players (in percentage).	134
4.3.7	Understanding of Nutrition Facts Panels (NFP)s among the football players (in percentage).	135
4.3.8	Pre and post knowledge scores regarding various components of food labels	136
4.3.9	Pre and post GDA labelling scores	138

LIST OF FIGURES

Table no.	Title	Page no.
2.3.1	Diet composition, muscle glycogen levels and time to fatigue	20
2.11.1	Health choice logo	48
2.11.2	Guiding Star symbol	48
2.11.3	Keyhole symbol	49
2.11.4	Facts Up Front label	49
2.11.5	Traffic light labeling system	50
2.11.6	Color coded GDA and commonly adopted GDA labeling	51
3.1.1	Schematic diagram representing design of Phase I	54
3.2.1	Schematic diagram representing survey of processed packaged foods	66
3.3.1	Schematic diagram representing football players awareness and capacity building on food labelling.	69
4.1.3.1	Classification of total subjects according to BMI for age (in percentage)	78
4.1.3.2	Classification of total subjects according to step test (in percentage)	80
4.1.3.3	Classification of total subjects according to sit and reach test (in percentage)	80
4.1.3.4	Classification of total subjects according to 30 metre test (in percentage)	81
4.1.3.5	Classification of total subjects according to Juggling test (in percentage)	81
4.1.3.6	Classification of total subjects according to Kicking test (in percentage)	82
4.2.1.2.a	Types of Nutrition Facts Panel	111
4.2.1.2.b	Reporting of Mandatory nutrients on NFP in total products in percentage	111
4.2.1.2.d	Processed packaged foods high in Energy and Fat as per USDA criteria in processed packaged foods in percentage	114
4.2.1.2.f	Food products reporting Low, medium or high content of Fat, SFA, Sugar and Salt as per UK-FSA criteria in total products (in percentage)	117
4.2.1.3	Ingredient list compliance according to FSSAI of India in various food groups (in percentage)	118
4.2.1.4	Allergen declaration in various Food groups (in percentage)	118
4.2.1.5a	Health claims mentioned in various Food groups (in percentage)	120
4.2.1.5b	Nutrient claims declared on food labels in various food groups (in percentage)	121
4.2.2.1	Forms of products (in percentage)	124
4.2.2.2	Main nutrients in supplements under study (in percentage)	125
4.3.7	Understanding of different types of Nutrition Facts Panel among football players	135
4.3.8	Pre and Post knowledge scores on food labels among football players	137
4.3.9	Pre and Post GDA scores among football players	139
