

ACKNOWLEDGEMENTS

I was very fortunate that I was posted to the then Gujarat Electricity Board at a time when that organization was preparing to undertake a momentous Reform and Change agenda. From 2002 onwards, the GEB, under the support and guidance of the Energy and Petrochemicals Department of the State Government, went on facing the challenges by undertaking comprehensive reforms. I was part of the team headed by the Chief Minister Sri Narendra Modi, who headed the Energy portfolio and was a great champion of the reform agenda. His deputy Sri Saurabh Patel, the Minister of State for Energy and Petrochemicals was directly involved in this gigantic task with equal enthusiasm. Hence I would sincerely acknowledge their contribution and support for giving me an opportunity of being part of the Change team that was involved in that period. It is a matter of fortuitous coincidence that the thesis on the change agenda in the Gujarat Power Sector Reforms is being submitted in the Swarnim Jayanti Year of the State of Gujarat.

I am sincerely indebted to Dr. Manjula Subramaniam, the then Chairperson of the GEB and the Principal Secretary of the Energy and Petrochemicals Department, who helped me a lot in my understanding of the complexities of the Energy sector. I learnt and comprehended many complex issues and tasks from her as she was immensely experienced in the Energy sector and had strong academic rigor and discipline. I am also thankful to my senior colleagues in the setup, Sri MM Srivastava, the then Member (Finance) and later the Principal Secretary in the Energy Department and Smt Vijayalaxmi Joshi, who served both as Member (Finance) of the GEB and Principal Secretary of the Energy Department. I learnt a lot from them as the complexities of the reform agenda unfolded. I am also thankful to my other colleagues Sri Chuaungo and Sri HS Patel, who worked with me in implementing many of these concepts as they were intimately involved in the Reform agenda. I am also thankful to Dr. P.K Das, an ex-Chairman of the GEB and Principal Secretary of the Energy Department, who combined great experience and academic caliber, as he provided me with several inputs related to my field of study.

Prof Kirankumar M Joshi, Faculty of Management Studies, and my Guide, has been a friend, philosopher and guide to me in this project. Apart from his academic achievements, he has been intimately associated with the State Power sector as he has been involved in several committees and activities related to the Change Management exercise in the energy sector in the state. He has been involved at every stage of this exercise and this work would have been well nigh impossible without his proactive support. I am indeed grateful to him.

I would take this opportunity to thank Dr. MK Iyer, Member (Finance) of GERC and my ex-colleague in the ex-GEB, who has been very supportive in my activity. He has provided me with several articles, books and valuable data and reports about the Power sector reforms.

I am also very thankful to Sri Gopal Dayalani, an engineer from UGVCL, who works with me as EA to the Chairman. He has worked hard in providing me latest data and reports from various sources. I also remember with gratitude the role played by Sri Bhadresh Prajapati, who works with me in GACL, Baroda for his tiresome efforts in preparing and updating tables, and making available all information required from the internet. I really thank these two associates of mine for their enthusiastic support and assistance.

And lastly I remember my two loving children Jimutbaran and Diptiman and hope that this humble work of mine would spur them to conquer greater academic challenges in life.
