

LIST OF FIGURES

1.1	Flow diagram of lube oil processing units	8
1.2	Schematic flow diagram of Propane dewaxing unit	14
1.3	Schematic flow diagram of MEK dewaxing unit	15
2.1	B.P. SCP Process using gas oil	42
2.2	B.P. SCP Process using n paraffin	43
2.2.3	Cattlefeed production in India	61
3.1.4	Bioreactor set up	67
4.1.1	Growth of yeast strains in shake flasks	86
4.1.2	Photographs of microscopic observation of different phases of shake flasks culture	89-90
4.1.3	Different phases of culture	90
4.2.1	Effect of temperature on μ	100
4.2.2	Activation energy of the strain on different hydrocarbons	102
4.2.3	Biomass yield and pour point at different temperature	102
4.2.4	Effect of pH on μ	106
4.2.5	Effect of oil concentration on dewaxing	111
4.3.1	Dewaxing of sample 'A' by <i>C. tropicalis</i>	123
4.3.2	Dewaxing of sample 'B' by <i>C. tropicalis</i>	124
4.3.3	Dewaxing of vacuum distillate sample 'A' by semicontinuous operation	125
4.4.1	Power law curve of the culture fluid	130
4.4.2	Change of viscosity of broth and pour point	131
4.4.3	Specific growth rate at different OTR	136
4.4.4	Specific growth rate at different N_{ReI}	139

4.4.5	Effect of P/V on specific growth rate	143
5.1	Effect of Solvent/Emulsion on oil recovery	163
5.2	Retention value (K) at different oil concentrations	164
5.3	Graphical determination of stages required for leaching operations	165
