

A C K N O W L E I G E M E N T S

I express my heartfelt indebtedness to Dr. S. D. Sabnis, Professor of Botany, Department of Botany, M. S. University of Baroda, Baroda for suggesting the problem. I also express my deep sense of gratitude to him for his excellent instructions and stimulating criticism, throughout the course of the investigation and preparation of the manuscript.

I also express my sincere thanks to Prof. C. H. Pathak, Professor and Head of the Department of Botany for providing necessary facilities during the course of this study.

I am ever thankful to Shri M. R. Trivedi, Principal, V. S. Patel College of Arts and Science, Bilimora and also to the managing committee of the said institution for granting me necessary leave for the present study. The award of Teacher Fellowship under the Faculty Improvement Programme by the University Grants Commission to carry out the present work is also thankfully acknowledged.

Thanks are also due to Dr. R. P. Bhatt, Dr. Prathapasenan and other staff members of the Botany Department for their kind cooperation and help given whenever needed during the course of the present work.

I wish to thank the Principal, Agriculture College, Navsari

and the Head of the Soil Science Department of that institution for providing me facilities to carry out the soil analysis work in their laboratory.

I also thank Prof. H. D. Kumar, Botany Department, Banaras Hindu University, Varanasi for granting me access to the Departmental library and providing an opportunity for fruitful discussions with the staff members especially of the Ecology Section of the department.

Special thanks are due to Prof. G. C. Patel, Head, Department of Statistics, V. S. Patel College, Bilimora and to Dr. D. K. Shah, Reader in Statistics, Department of Statistics for their valuable guidance in the statistical analysis of the experimental data.

I also thank Dr. (Miss) H. K. Patel, Head, Botany Department, P. T. Sarvajani College of Science, Surat and Shri G. A. Gandhi, my colleague at Bilimora for their cooperation and help.

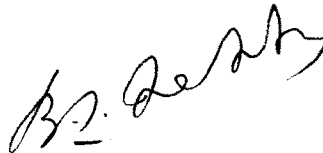

Thanks are also due to Sarvashri J. V. Joshi, M.M.Moghe, S. N. Patil, Dr. P. D. Kulkarni, Kavikishore and other research colleagues in the department for their kind cooperation and help given whenever needed during the course of this study.

I thankfully acknowledge the cooperation given by Sarvashri M. C. Kulkarni, P. T. Dindorkar and P. S. Bhoite

in my work. Assistance given by Shri Raju Modi in tracing of graphs is thankfully acknowledged.

At this stage I cannot forget to pay due respects to my late father and my revered mother without whose blessings this work would have never been completed.

Last, but not the least, my heartfelt thanks are due to my wife Anila and my children - Parul, Vyomesh and Rupal, who sustained a lot due to my being comparatively unattentive to them during the period of this study.

A handwritten signature in black ink, appearing to read 'B. S. Mehta', with a stylized flourish at the end.
