

## **BIBLIOGRAPHY**

- (01) Buesgen A., Woven 3- dimensional shapes – updates and future prospects for new weaving techniques, Melliand English, 6/ 1999, Pages E 130 – 132.
- (02) Great Britain Patent GB 105458, Hill H., 1916 (Improvements in the manufacture of, tubular woven fabrics for incandescent mantle foundations.
- (o3) US Patent 1735467, Nov. 1929, C. Lipper, Method of making hats and the product thereof.
- (04) US Patent 3132671, 12-5-1964, E.Koppelman et al., Method and apparatus for weaving shaped fabrics and articles woven thereby
- (05) US Patent 3016068, 9 -1-1962, J. Felix, loom for weaving non-cylindrical fabrics
- (06) John A. McGrath, Walter A. Rheume and Arthur R. Campman, The weaving of three-dimensional fabrics for aerospace industry, 12<sup>th</sup> National SAMPE Symposium
- (07) US Patent 4825912, 2-5-1989, Fleury et al, Apparatus for weaving spheriodially contoured fabric
- (08) German Patent DE3912085, 15-11- 1990, Buesgen A. et. al., Loom for threee=dimensional fabrics – give variable warp lengths and intervals with shapers to give material a durable form
- (09) German Patent DE4137082, 13-5-1993, Buesgen et. al., Weaving loom appliance – enables reed staves to be moved to open or close the warp as required

- (10) US Patent 6000442, 14-12-1999, Buesgen A., Woven fabrics having a bulging zone and method and apparatus of forming the same
- (11) US Patent 6575201, 10-06-2003, Buesgen A., Fabric with a variable width
- (12) German patent DE10043291, 12-04-2001, Buesgen A., Garments made of tubular components are woven directly without longitudinal or transverse seams by splitting the warp and optionally also the weft
- (13) German patent DE10110031, 12- 09-2002, Buesgen A., Garment making process involves weaving tubular pieces adopted to body part shape, e.g. Legs, arms
- (14) German Patent DE10133338, 18-04-2002, Buesgen A., Weaving seamless, folded, flat flexible hose to make inflatable seat belt employs reciprocating fly shuttle process forming complete folded profile continuously.
- (15) German Patent DE 102004032410, 19-01-2006, Buesgen A., Clothing with sensory elements
- (16) K.Anderson and A.M. Seyam, Construction of seamless shaped woven structures, Textile Asia, May 2005,Page 27 - 30
- (17) E.Berndt, M.Geuer, B. Wulforst, Three dimensional textile structures for the production of technical textiles (2000, Technical Textiles, Vol. 44, Nov. 2001
