

Table of Contents

List of Abbreviations	iv
List of Symbols	vi
List of Figures	vii
List of Tables	xi
Chapter 1: Review of literature	1
Introduction	2
1.1. Distribution and Phylogeny of <i>Deinococcus</i>	3
1.2 General features of <i>Deinococcus radiodurans</i>	6
1.3 Cellular damage caused by radiation.....	10
1.4 Radiation Resistance mechanism in <i>Deinococcus radiodurans</i> R1	14
1.5 Models of radiation resistance in <i>D. radiodurans</i> R1	18
1.6 Anti-oxidant protection in <i>D. radiodurans</i> R1	20
1.7 <i>Deinococcus</i> as candidate for bioremediation	26
1.8 Engineering <i>Deinococcus radiodurans</i> for bioremediation	27
Scope of the thesis.....	28
Chapter 2: Development of a <i>Deinococcus</i> specific hemi-nested PCR method for the environmental detection and study of culture-independent diversity of <i>Deinococcus</i> sp.	
2.1 Introduction	30
2.2 Materials and Methods	32
2.2.1 Bacterial strains and growth conditions.....	32
2.2.2 Bioinformatics tools used for the designing of <i>Deinococcus</i> specific primer	32
2.2.3 Soil sample collection.....	32
2.2.4 Isolation of radiation resistant bacteria.....	33
2.2.5 Determination of UV tolerance of the bacterial isolates	34
2.2.6 Biochemical characterisation of the radiation resistant isolates	34
2.2.7 Soil community DNA isolation	35
2.2.8 PCR amplification of 16S rRNA gene using universal primers	35
2.2.9 PCR Amplification of 16S rRNA gene using <i>Deinococcus</i> specific primer	35
2.2.10 Construction and analysis of deinococcal 16S rRNA gene fragment library	36

2.2.11 PCR-DGGE of 16S rRNA gene	37
2.2.12 DNA sequencing and phylogenetic analysis	37
2.3 Results and Discussion.....	38
2.3.1 Designing and in-silico validation of <i>Deinococcus</i> specific primer	38
2.3.2 Development of <i>Deinococcus</i> specific hemi-nested PCR protocol.....	38
2.3.3 PCR amplification of deinococcal 16S rRNA gene fragments from environment using <i>Deinococcus</i> specific primers	43
2.3.4 <i>Deinococcus</i> diversity analysis using PCR-DGGE	47
2.3.5 Culturable diversity of the radiation resistant bacteria	52
2.4 Conclusion.....	58
Chapter 3: Heavy metal interactions in <i>Deinococcus</i> sp.	60
3.1 Introduction	61
3.2 Materials and methods	62
3.2.1 Bacterial strains and plasmids	62
3.2.2 DNA manipulations	63
3.2.3 Influence of heavy metals on growth of radiation resistant bacteria	63
3.2.4 Influence of Cd ²⁺ and Mn ²⁺ on recovery from H ₂ O ₂ damage	64
3.2.5 Influence of Cd ²⁺ and Mn ²⁺ on recovery from UV damage	64
3.2.6 Determination of reactive oxygen species (ROS) in bacterial cells	64
3.2.7 Assay of reactive oxygen species (ROS) combatting enzymes.....	66
3.2.8 Activity staining of ROS reactive combative enzymes	66
3.2.9 Construction of pRADZ3-PrecA	67
3.2.10 β-galactosidase assay	67
3.2.11 Quantification of total carbonylated protein.....	68
3.2.12 Immunodetection of carbonylated proteins	68
3.2.13 Determination of thiobarbituric acid-reactive substances (TBARs)	69
3.2.14 Metal binding protein preparation by Immobilised metal affinity chromatography (IMAC).....	69
3.2.15 Two- Dimensional gel electrophoresis (2-DE).....	70
3.3. Results and Discussion.....	71
3.3.1 Metal tolerance of radiation resistant bacteria.....	71
3.3.2 Effect of growth phases on Cd ²⁺ toxicity	74
3.3.3 Cd ²⁺ and reactive oxygen species (ROS) generation.....	81
3.3.4 Effect of Mn ²⁺ and Cd ²⁺ on recovery from H ₂ O ₂ stress in DR1.....	84

3.3.5 Growth phase dependent production and influence of Cd ²⁺ on anti-oxidative enzymes	84
3.3.6 Effect of Mn ²⁺ and Cd ²⁺ on survival after UV exposure	88
3.3.7 Effect of Cd ²⁺ on transcriptional regulator, PprI and Ppr M in DR1	92
3.3.8 Protein profiling in response to Cd ²⁺ in DR1	94
3.3.9 Cd ²⁺ and Mn ²⁺ binding proteome of DR1	96
3.4 Conclusion.....	100
Chapter 4: Cloning and expression of metallothionein genes in <i>Deinococcus radiodurans</i> R1	102
4.1 Introduction	103
4.2 Material and Methods.....	105
4.2.1 Bacterial strains, and Plasmids used in this study	105
4.2.2 Chemicals and enzymes.....	106
4.2.3 Media and Growth conditions	106
4.2.4 Synthesis and PCR amplification of the <i>ec20</i>	106
4.2.5 PCR Amplification of <i>smt A</i>	108
4.2.6 DNA manipulations	108
4.2.7 Expression analysis of <i>smt A</i> in E.coli BL21 (DE3).....	109
4.2.8 SDS-PAGE analysis	110
4.2.9 Cd ²⁺ tolerance	110
4.2.10 Metal estimation by ICP-AES	110
4.3 Results and Discussion.....	110
4.3.1 Synthesis, amplification and cloning of synthetic phytochelatin, <i>ec20</i>	110
4.3.2 Sub-cloning of <i>ec 20</i> in pRADZ3.....	112
4.3.3 Construction of pRAD- <i>smt A</i> for heterologous expression in DR1	113
4.3.4 Transformation and expression analysis of pRAD-ECand <i>prad-smtA</i> in DR1.....	116
4.3.5 Characterization DR1 (pRAD-EC) and DR1 (pRAD- <i>smtA</i>)	116
4.4 Conclusion.....	124
Appendix I:	126
Appendix II:.....	133
Appendix III:	141
References.....	1455
Summary.....	1766
Presentations and Publications.....	1811
