

## LIST OF PLATES

<u>PLATE NO.</u>		<u>PAGE NO.</u>
III.1	Panoramic view from Wilson hill looking north, showing overall step-like topography, East-looking.	51
III.2	East-looking panoramic view from village Garkhadi showing horizontal flows, flat topped hills, different types of slopes and various landforms.	52
III.3	Fine compact basalt within thin strings of amygdules. Location : NE of Khatal village.	55
III.4	Tuffaceous layer between two different flows. Location : Par river bed West of village Kachigam.	55
III.5	A view looking north from village Hatgad showing slope breaks and contrasting vegetation.	57
III.6	A close up view of the weathered basalt layers Location : 1 km. South of Ahwa on Ahwa-Saputara road.	57
III.7	A NNE-SSW trending dyke in the bed of river Par, showing lateral shifting. Location : North of Vadkhamba village.	60
III.8	Columnar jointing in a quarry section in finegrained compact basalt. Location : Chikhli.	61
III.9	Sheet joints in basalts. Location : Purna river bed near Garkhadi village.	61
III.10	Conjugate joints in compact basalts. Location : Man river bed below the bridge Dharampur-Bansda road South of Karenjveri village.	62
III.11	Conjugate joints in amygdaloidal basalt. Location : Nirpan river bed West of Anklachh village.	62

III.12	Spheroidal weathering in basalt. Location : Tan river bed near Kanpur village.	64
III.13	Photomicrograph of compact basalt, ( x 55; cross-nicols).	66
III.14	Photomicrograph of porphyritic basalt, (x 55; cross-nicols).	66
III.15	Photomicrograph of sub-ophitic to ophitic texture, ( x 55; cross-nicols).	67
III.16	Photomicrograph of finegrained amygdaloidal basalts, ( x 55; cross-nicols).	67
III.17	Photomicrograph of finegrained amygdaloidal basalts showing zeolites, ( x 55; cross-nicols).	69
III.18	Photomicrograph view of calcite as infilling in amygdule, ( x 55; cross-nicols).	69
III.19	Photomicrograph of phenocryst of andesine in andesite, (x 55; cross-nicols).	70
III.20	Photomicrograph of a dolerite, (x 55; cross-nicols).	70
III.21	Photomicrograph of a olivine dolerite, (x 55; cross-nicols).	72
III.22	Photomicrograph of a basaltic dyke, (x 55; cross-nicols).	72
III.23	View of a typical lateritic profile. Location : Village Munjla near Tarkeshwar.	74
IV.1	Satellite Imagery (Landsat) of terrain around Purna and Ambica rivers.	83
IV.2	Satellite Imagery (Landsat) of the Southern part of the area.	84
IV.3	E-W linear region with escarpments and also colluvial fans at the base (view looking north from Wilson hill).	98
IV.4	View of a ENE-WSW trending Mesa on Surgana-Saputara road.	98

IV.5	View of a Butte looking southward. Location : Warse village.	104
IV.6	View of a Cuesta looking northward near Vanar village.	104
IV.7	View of typical conical hills looking eastward. Location : Garkhadi village.	106
IV.8	View of narrow and broad valleys looking northward Location : Wilson hill.	107
VI.1	Experimental model showing upliftment of wax blocks under compressional stress (Simulating Horst and Graben Formation).	185
