

LIST OF TABLES

	After page
TABLE : 2.1 Chronostratigraphic Classification of Kachchh (after Krishnan, 1968)	15
TABLE : 2.2 Lithostratigraphic Classification of Kachchh MainLand (after Biswas, 1971, 1977)	16
TABLE 3.1 Stratigraphy of the Quaternary deposits of the study area	42
TABLE : 5.1 Table showing characteristics of the various erosional surfaces in the Khari river basin.	64
TABLE : 5.2 Fault scarp morphology of Katrol hill range, slope elements, processes involved and approximate chronology.	66
TABLE : (6.1a & b) Important morphometric parameters of the Khari River Basin.	71
TABLE : 6.2 Table showing important quantitative land form parameters, computed on the basis of length and elevation data measured from the topographic maps for some of the selected streams.	77
TABLE : 6.3 Values of stream gradient and stream gradient index for selected segments.	77
TABLE : 6.4 Table showing values of Channel Index (CI), valley Index (VI), Standard Sinuosity Index (SSI), Hydraulic	80

Sinuosity Index (HSI) and Topographic Sinuosity Index (TSI) are computed for various segments of Khari river main channel and its tributaries.

TABLE : 6.5 Mountain front sinuosity of various mountain fronts of the Khari River Basin. 82

TABLE : 6.6 Data showing total number, total length and average length for each azimuth class of lineament orientation based on drainage. 83
