

## ACKNOWLEDGEMENTS

No words are adequate to express my indebtedness to Dr. Bonny Pilo, Reader in Zoology, Department of Zoology - my guide and mentor who broached the problem, ignited the spark and initiated me to the magnificent field of research. His unfailing and unflinching encouragement, advice and inspirational guidance have gone a long way in providing me the necessary motivation and impetus to complete the task at hand successfully. Moreover, I will be failing in my duties if I don't record my gratitude for his wisdom and patience which have steered me through whenever and wherever I faltered.

I wish to record my deep sense of gratitude to Prof. R.V. Shah, former Head of the Department of Zoology, whose encouragements and help sustained my efforts in research. I am also thankful to him for providing facilities in the department for conducting research.

I would also like to record my gratitude to Prof. P.M. Ambadkar, Head, Department of Zoology, M.S. University of Baroda, Baroda, for providing facilities and encouragements.

I am thankful to U.G.C. Government of India for awarding a Junior Research Fellowship during the tenure of which this work was carried out.

I also wish to thank Dr. A.V. Ramachandran for going through the thesis critically.

I am indebted to Dr. P.V. Patel and Dr. R.J. Verma whose help and suggestions have immensely contributed to the study. I am also thankful to Dr. (Mrs) J.G. Menon, Dr. (Mrs) Saheba, Miss Pragna Mehta, Miss Chitra Ayyar, Miss Ketaki Derasari and Miss Meena Patel and all other colleagues for their help and co-operation in the preparation of this thesis. Last but not the least I am thankful to my parents for their constant encouragement.

MEHAN, S.P.
