

LIST OF FIGURES

Fig. 1: Anatomical structures of the eye.....	10
Fig. 2: Schematic diagram showing diposition of drugs instilled into the eye.....	18
Fig. 3: Chromatogram showing separation of (1) Ciprofloxacin ethylenediamine analog (Analog-A) and (2) Ciprofloxacin.....	73
Fig. 4: Chromatogram showing separation of (1) Analog-A, (2) Ciprofloxacin and (3) Dexamethasone.....	78
Fig. 5a: Infra-red spectrum of Ciprofloxacin hydrochloride USP.....	104
Fig. 5b: Infra-red spectrum of Ciprofloxacin hydrochloride USP sterilized by ethylene oxide..	105
Fig. 6a: Chromatogram of (1) Ciprofloxacin HCl USP and (2) Ciprofloxacin HCl USP sterilized by ethylene oxide	106
Fig. 7a: Infra-red spectrum of Dexamethasone IP.....	109
Fig. 7b: Infra-red spectrum of Dexamethasone IP sterilized by heating at 140°C in hot air oven..	110
Fig. 7c: Infra-red spectrum of Dexamethasone IP sterilized by heating at 140°C <i>in vacuo</i>	111
Fig. 8: Chromatograms of (a) Dexamethasone IP, (b) Dexamethasone IP sterilized by heating at 140°C in hot air oven and (c) Dexamethasone IP sterilized by heating at 140°C <i>in vacuo</i>	112
Fig. 9: DSC scan of (1) Dexamethasone IP, (2) Dexamethasone IP sterilized by heating at 140°C in hot air oven and (3) Dexamethasone IP sterilized by heating at 140°C <i>in vacuo</i>	113
Fig. 10: <i>In vitro</i> release profile of ciprofloxacin from gels prepared with different concentrations of Pluronic F-127.....	147
Fig. 11: Photographs of the rabbit eyes: (a) normal eye (b) infected eye treated with normal saline, (c) infected eye treated with ciprofloxacin alone and (d) infected eye treated with ciprofloxacin and dexamethasone	176

Fig. 12: Aqueous humour concentration - time profile of ciprofloxacin following instillation of a single dose of the prepared conventional solution and Ciplox ^R	183
Fig. 13: Aqueous humour concentration - time profile of ciprofloxacin following instillation of multiple doses of the prepared conventional solution and ciprofloxacin long acting gel.....	183
Fig. 14: Aqueous humour concentration - time profile of ciprofloxacin following instillation of multiple doses of the prepared conventional solution and ciprofloxacin ointment.....	185
