Table of Contents

CHAPTER			Page
I		INTRODUCTION	1-28
	1.1	Ideal characteristics	1
	1.2	Application of AC-AC converters	1
	1.3	AC-AC conversion	3
		1.3.1 Electromechanical AC-AC conversion	3
		1.3.2 Indirect AC-AC conversion	3
		1.3.3 Direct AC-AC conversion	5
		1.3.3.1 AC power controller	6
		1.3.3.2 Cycloconverter	10
	1.4	Modern trends of AC-AC conversion	20
		1.4.1 forced commutated converters	20
		1.4.2 Active filter topology	22
		1.4.3 Matrix converter	23
	1.5	Review of previous work	24
	1.6	Objective of thesis work	26
	1.7	Outline of the thesis	27
II		MODELING AND ANALYSIS OF DIRECT AC-AC CONVERTERS	29-78
	2.1	Introduction:	29
	2.2	Practical Implementation Of Three-Phase To Three-Phase Direct AC-AC Converters	30
		2.2.1 Bi-directional switch configurations	32
		2.2.2 The Modulation Problem and Basic Solution	34
		2.2.3 The Commutation problem	46
		2.2.4 The input filter issue	51
		2.2.5 The protection issue	54
	2.3	The Performance	58
	2.4	Comparison	61
	2.5	Simulation of Static AC-AC using IMO mode of operation	63
	2.6	Three phase to single phase conversion	70
	2.7	Simulation of the three-phase to single-phase converter	72
	2.8	Single-phase to Three-phase converter	75
	2.9	Conclusion	78
III		MODELING AND ANALYSIS DIRECT AC-AC CONVERTERS FOR HIGH FREQUENCY APPLICATIONS	79 - 127
	3.1	Introduction	79
	3.2	High frequency Direct AC –AC converters:	81
		3.2.1 Three-phase to three phase HF generator:	82
		3.2.2 Three-phase to single-phase high frequency direct AC-AC converter	83
	3.3	Simulation of the 3Φ - 3Φ high frequency direct AC-AC converter	85
	3.4	The Proposed Converter & its Control	89

		3.4.1 Primary converter	89
		3.4.2 High frequency link transformer	98
		3.4.3 Secondary converter	102
	3.5	Simulation of the Proposed Technique	117
	3.6	Conclusion	127
IV		**DIRECT AC-AC CONVERTER- PRACTICAL IMPLEMENTATION**	128 – 147
	4.1	Control Circuit Implementation	129
		4.1.1 ZCD and sector determination	129
		4.1.2 Duty Cycle calculation:	131
		4.1.3 Ramp generation circuit	133
	4.2	Power Circuit Implementation	143
	4.3	Conclusion	147
V		**DIRECT AC-AC CONVERTER WITH REDUCED NUMBER OF SWITCHES**	148-167
	5.1	Introduction	148
	5.2	Switch Reduction in Direct AC-AC converters	149
	5.3	PWM control scheme	153
	5.4	Simulation and its results	157
	5.5	Experimental Results	164
	5.6	Conclusion	167
VI		**APPLICATIONS OF DIRECT AC-AC CONVERTER**	168-197
	6.1	Introduction	168
	6.2	Proposed switch mode power supply	170
	6.3	Proposed converter PWM modulation	171
	6.3.1	Rectifier mode of operation	172
	6.3.2	Inverter mode of operation	174
	6.4	Proposed switching modulation	175
	6.5	Design Example	177
	6.6	Input filter design	178
	6.7	Simulation results	178
	6.8	Experimental results	181
	6.9	Applications of conventional Direct AC-AC converters for variable frequency wind turbine applications:	186
	6.10	Implementation of proposed converter for control of DFIM for wind turbines	190
	6.10.1	C_{rotor} control system	192
	6.10.2	C_{grid} control system	195
	6.11	Conclusion	196
VII		**CONCLUSION**	198-200
	REFERENCES		201-207
	ANNEXURE I		208-211
	ANNEXURE II		212-216
	ANNEXURE III		217-230
