# LIST OF FIGURES

| Table No. | Title | Page No. |
|---|---|---|
| | **Review of Literature** | |
| 2.1 | A conceptual framework of nutritional problems and causal factors in adolescence | 6 |
| 2.2 | Trends in Obesity among children and adolescents: United States, 1963-2008 | 15 |
| 2.3 | Stages of nutrition transition | 22 |
| 2.4 | Recommended constituents of day's food intake | 30 |
| 2.5 | Iron needs during adolescence | 37 |
| 2.6 | Health promotion encompasses a range of activities | 42 |
| 2.7 | A framework for health promotion | 43 |
| | **Methods & Materials** | |
| 3.1 | Study design | 84 |
| | **Results** | |
| | **PHASE I** | |
| 4.1.1 | Sales trend of popular snacks (average pieces/day) at baseline in experimental school | 136 |
| 4.1.2 | Daily sales trend of beverages (glasses or tetra packs) at baseline in experimental school | 137 |
| 4.1.3 | Percent prevalence of nutritional status of the study subjects from the selected two schools | 139 |
| 4.1.4 | Prevalence of anemia, malnutrition, sub optimal blood pressure and central obesity among the study subjects from the selected two schools | 140 |

| | | |
|---|---|---|
| 4.1.5 | Percent prevalence of Dyslipidemia (ATP III & AHA classifications) and Glucose Intolerance (IDF Classifications) in over weight and obese subjects from the selected two schools | 141 |
| 4.1.6 | Percent prevalence of modifiable risk factors among the study subjects from the selected two schools | 141 |
| | **PHASE II** | |
| 4.2.1 | Sale trend of proposed milk beverages and fruit juices in the five days trial period | 168 |
| | **PHASE III** | |
| 4.3.1 | Compliance of IFA supplementation among study subjects (≥75%) | 177 |
| 4.3.2 | BMI chart plotting by the students after capacity building session | 186 |
| | **Summary and Conclusion** | |
| 5.1 | Percent prevalence of healthy and malnourished study subjects in the selected two schools | 219 |
| 5.2 | Percent prevalence of malnutrition, central obesity and high blood pressure among the study subjects | 220 |
| 5.3 | Mean number of products sold in five days pilot trial | 220 |
| 5.4 | Changes in prevalence of anaemia in the study subjects before and after intervention in relation to compliance of IFA tablets | 221 |
| 5.5 | Percent change in prevalence of anaemia in relation to compliance of IFA tablets (11-12 tablets) among the study subjects (N=197) | 221 |
| 5.6 | Percent change in prevalence of anaemia in relation to compliance of IFA tablets (9-10 tablets) among the study subjects (N=197) | 222 |

| | | |
|---|---|---|
| 5.7 | Percent change in prevalence of anaemia in relation to compliance of IFA tablets (8 tablets) among the study subjects (N=197) | 222 |
| 5.8 | Percent change in prevalence of anaemia in relation to compliance of IFA tablets (< 8 tablets) among the study subjects (N=197) | 223 |
