

C O N T E N T S

CHAPTER		PAGE
	INTRODUCTION	1
1	Effects of castration on liver lipids in albino rats.	14
2	Hepatic free fatty acids in castrated and testosterone treated rats.	41
3	Effects of castration and hormone replacement on some aspects of hepatic carbohydrate metabolism.	57
4	Effects of castration and testosterone propionate administration on the levels of nucleic acids and total protein of the liver of white rats.	75
5	Influence of testosterone propionate on hepatic ascorbic acid levels.	95
6	Effects of castration on Mg^{++} dependent adenosine triphosphatase (ATPase) activity of rat liver.	108
7	Alterations in non-specific phospho-monoesterase activity under the influence of sex hormones in rat liver.	122

CHAPTER		PAGE
8	Some aspects of fatty acid metabolism in male albino rats under the influence of sex hormones.	139
9	Alterations in certain metabolites of blood plasma as influenced by sex hormones.	151
10	A preliminary study on mediator action of cyclic AMP elicited by sex-hormones in the hepatic tissue of rats as revealed by cAMP specific phospho- diesterase levels.	164
11	Study of rapid effects of TP administration on hepatic metabolic patterns of rat.	173
	SUMMARY	189
	GENERAL CONSIDERATION	202
