PART - I : GENERAL INFORMATION ON CALCITE

							<u>Page</u>
<u>CHAPTER - I</u>							
1.1	Introduction	...	...	...	...	...	1
1.2	Occurrence	...	...	...	...	...	1
1.3	Crystal Composition	...	...	...	...	...	2
1.4	Calcite group and its structure	...	...	...	...	...	3
1.5	Form and habit	...	...	...	...	...	4
1.6	Cleavage, gliding and Twinning	...	...	...	...	...	5
1.7	Percussion mark	...	...	...	...	...	6
1.8	Properties of calcite crystals	...	...	...	...	...	8
1.9	Uses	...	...	...	...	...	10

CHAPTER - II : EXPERIMENTAL TECHNIQUES

2.1	Introduction	...	...	...	...	...	11
2.2	Vertical incident light microscope (CZ)	...					11
2.2.1	Indentation Technique	...	...				15
2.3	Etch Method	***	...	...	...	...	20
2.3.1	Preparation of a solution	...	...				21
2.3.2	Etching at high and low temperature						27
2.4	Semi-micro balance	...	...	...	...	...	28
2.5	Determination of Conductivity of Liquid	...					30
2.5.1	Introduction	...	...	...	...	...	30
2.5.2	Wheatstone net	...	...	...	...	...	32
2.5.3	Conductivity Measuring Bridge	...					34
2.5.4	Measurement of Conductivity	...					36

PART - II : CHEMICAL DISSOLUTION OF CALCITE CLEAVAGES

CHAPTER - III : DISSOLUTION (GENERAL)

		<u>Page</u>
3.1	Introduction ... ... ... ...	39
3.2	Dislocation delineation by etching ...	40
3.3	Formation of visible etch pits ...	47
3.4	Etch pits and their characteristics ...	52
3.5	Kinetics and mechanism of dissolution ...	58
3.6	Fact formation of etch pit ... ... ...	65

CHAPTER - IV : DISSOLUTION OF CALCITE IN ORGANIC ACIDS-I  
(Effect of etching time and concentration)

4.1	Introduction ... ... ... ...	66
4.2	Experimental ... ... ... ...	68
4.3	Observations and Results ... ... ...	69
4.3.1	Effect of time on morphology of etch pits ... ... ...	69
4.3.2	Effect of Concentration on morphology of etch pits ... ...	70
4.3.3	Effect of time on etch rates ...	76
4.3.4	Effect of concentration on etch rates	77
4.4	Discussion ... ... ... ...	79
4.4.1	Morphology of etch pits ... ...	79
	(a) Observation of fixed shape at certain concentration of the etchant ... ... ...	79
	(b) Change of shape with change in concentration (range) of an etchant ... ... ...	80
4.4.2	Requirements of a good etchant ...	83
	(a) Characteristics of lactic acid as the etchant ...	86

	(b) Characteristics of formic acid as the etchant	...	...	87
	(c) Matching of cleavage counterparts in lactic and formic acids	...	...	87
	(d) Quality of etch pits	...	...	88
4.4.3	Nature of etch rate versus concentration plots	...	...	89
	(a) Availability of ions	...	...	91
	(b) Ionic mobility	...	...	92
	(c) Analysis of viscosity effects ..			95
	(d) Inhibition by reaction products			96
4.5	Conclusions	...	...	97

CHAPTER - V : DISSOLUTION OF CALCITE IN ORGANIC ACIDS-II (Effect of temperature)

5.1	Introduction	...	...	...	...	99
5.2.	Experimental	....	...	...	...	99
5.3	Observations and Results	...	...	...	...	100
5.3.1	Effect of temperature on morphology of etch pits	...	...	...	...	100
5.3.2	Effect of temperature on etch rates	...	...	...	...	102
5.4	Discussion	...	...	...	...	104
5.4.1	Morphology of etch pits	...	...	...	...	104
5.4.2	Mechanism of dissolution	...	...	...	...	107
5.4.3	Nature of Adsorption	...	...	...	...	110
5.4.4	Concentration dependence of pre-exponential factors	...	...	...	...	112
5.4.5	Temperature dependence of peak concentration	...	...	...	...	115
5.5	Conclusions	...	...	...	...	116

PART - III : MICROINDENTATION HARDNESS OF CALCITE  
CLEAVAGES

CHAPTER - VI : MICROHARDNESS OF CRYSTALS (GENERAL)

							<u>Page</u>
6.1	Introduction	...	...	...	...	...	118
6.2	Definitions and Measurements			...	...		118
6.3	General Information on Hardness			...	...		123
6.4	Variation of hardness with load			...	...		126

CHAPTER - VII : VARIATION OF LOAD WITH DIAGONAL  
LENGTH OF INDENTATION MARK

7.1	Introduction	...	...	...	...	...	140
7.2	Experimental	...	...	...	...	...	141
7.3	Observations	...	...	...	...	...	143
7.4	Results and Discussion			...	...	...	144
7.4.1	Characteristics of two straight line regions in the graph			...	...		147
7.5	Conclusions	...	...	...	...	...	149

CHAPTER - VIII : VARIATION OF HARDNESS WITH LOAD

8.1	Introduction	...	...	...	...	...	151
8.2	Observations	...	...	...	...	...	156
8.3	Results and Discussion			...	...	...	156
8.3.1	Relation between hardness and quenching temperature			...	...		158
8.3.2	Relation between hardness and electrical conductivity			...	...		173
8.4	Conclusions	...	...	...	...	...	183
	APPENDIX	...	...	...	...	...	A1
	REFERENCES	...	...	...	...	...	R1
