

### ACKNOWLEDGEMENTS

I take this opportunity of expressing my sincere thanks to Dr. N. S. Pandya, for his continued guidance, unfailing encouragement and keen interest and for providing excellent facilities of the Physics Laboratory of the Faculty of Science throughout the course of this work. Thanks are also due to my colleagues, Shri V. P. Bhatt and Shri R.D.Rao for helpful discussions from time to time.

I am grateful to Prof. D. V. Gogate, Head of the Physics Department, Shri K. R. Chaudhari for their kind interest and help and to the staff of the Physics Laboratory and Central Workshop of the Faculty of Science for their co-operation and help.

I wish to record my thanks to Shri P. K. Korane and Shri Dhirubhai Mehta of the Industrial Chemist's Laboratory for supplying some calcite crystals, to Shri S.D.Desai of the Geology Department of this University for supplying a crystal of calcite and fluorite and to the Director of Industries and Commerce, Andhra Pradesh, for supplying muscovita mica.

(ii)

Thanks are also due to Shri Y. K. Sane of the Botany Department for help in some photographic work, to Prof. A. R. Chavan, Head of the Botany Department for giving permission to do some photographic work in his department, and to Dr. J. S. Dave, Reader in  $\phi$  Inorganic and Physical Chemistry for some helpful discussions.

I am indebted to the Maharaja Sayajirao University of Baroda for the award of a Research Training Scholarship under the Research Training Scholarship Scheme (Government of India) and to the Council of Scientific and Industrial Research, New Delhi, for the award of a Junior Research Fellowship which enabled me to complete this work.
