

LIST OF FIGURES

Chapter 1

Figure 1.1 - Economic activity and the Environment	8
Figure 1.2 - De-linking economic growth and environmental quality	9
Figure 1.3 - Environment- Income relationship	15
Figure 1.4 - The Environmental Kuznets Curve	17
Figure 1.5 - Pollutant cycles due to substitution and technological change	21
Figure 1.6 - Decomposition effect	23
Figure 1.7 - Flatter EKC under various policy initiatives	24
Figure 1.8 (a) - EKC beyond threshold limits	25
Figure 1.8 (b) - Deep Inverted –U EKC when economic growth and environment complement each other	25
Figure 1.9 - Variants of EKC	26

Chapter 2

Figure 2.1 - Generic EKC	34
Figure 2.2 – Environmental Kuznets Curve	37
Figure 2.3 – The Environmental Kuznets Curve: A development- Environment relationship	43
Figure 2.4 – EKC of ECE region	44
Figure 2.5 – Removal of harmful subsidies, internalizing externalities and well defined property rights can flatten the EKC	65
Figure 2.6 – Development of a single country across different cross-section based EKC's with a significant negative time trend	71
Figure 2.7 – Development of a single country across different cross-section based EKC's linear time trend is not significantly different from zero	71
Figure 2.8 – Various specification between manifest, latent and composite variables	82

Chapter 3

Figure 3.1 – Path diagram a) effect indicator b) causal indicator	114
Figure 3.2 – Economic effect (factor)	117
Figure 3.3 – Demographic effect (factor)	118
Figure 3.4 – Environment effect (factor)	119
Figure 3.5 – Governance effect (factor)	120
Figure 3.6 – Hypothesized Path model.	126

Chapter 4

Figure 4.1 – Energy Mix of the World	128
Figure 4.2 – Sector-wise Coal consumption in India	129
Figure 4.3 – Expected GDP growth rate in future	130
Figure 4.4 – CO ₂ emissions per capita since 1960	133
Figure 4.5 – Growth – Income nexus	135
Figure 4.6 – Curve-estimation	135
Figure 4.7 – CO ₂ emissions forecast for India till 2077	138
Figure 4.8 – Scatter plot of Economic factors as independent variable and carbon dioxide as dependent variable.	144
Figure 4.9 – Line chart of Economic factors as independent variable and carbon dioxide as dependent variable.	144

Figure 4.10 – Scatter plot of Demographic factors as independent variable and carbon dioxide as dependent variable.	148
Figure 4.11 – Line chart of Demographic factors as independent variable and carbon dioxide as dependent variable.	148
Figure 4.12 – Scatter plot of Environmental factor as independent variable and carbon dioxide as dependent variable.	153
Figure 4.13 – Line chart of Environmental factor as independent variable and carbon dioxide as dependent variable.	153
Figure 4.14 – Line chart of governance factor against carbon dioxide emissions in India.	155
Figure 4.15 – Path diagram – Model A (Overall)	157
Figure 4.16 – Path diagram – Model B	162
Figure 4.17 – Path diagram – Model C (pre-liberalization)	166
Figure 4.18 – Path diagram – Model D (post-liberalization)	170
Annexure	175
