

ACKNOWLEDGEMENT

I had the privilege and honor of conducting the research under the able guidance of Dr. G. K. Hath1, Professor and Head, Department of Physiology, Medical College, Baroda. Paucity of words makes it difficult for me to express my sincere thanks and deep sense of gratitude towards her for her constant guidance, constructive criticism and personal interest throughout the course of my work. It is because of her invaluable inspiration, guidance and great latitude of freedom in planning and execution of my work, that this study has seen the light of the day.

I express my sincere gratitude to the Dean, Medical College, Baroda, for permitting me to use all the facilities.

I take it as a privilege and a duty to express my reverence to Dr. T.K. Das, Ex-Associate professor, Department of Physiology, Smt. N.H.L Municipal Medical College, Ahmedabad, whose innate innovativeness, invaluable advice and sustained interest enlightened my difficult path and made this study acceptable. For me, besides being a teacher, he has been a philosopher and a preacher and whatever I have learnt from him shall forever remain etched on my mind.

I want to express my deep appreciation to Dr. M.B. Jani and Dr. Elvy Oommen, Associate Professors and Dr. K.D. Pandya, Dr. D.R. Trivedi, Dr. N.R. Pathak and Dr. A.N Joshi, Assistant Professors, Department of Physiology for their suggestions and encouraging support throughout my research work.

I owe a special debt of gratitude to Dr. Divyesh .V. Shukla, Ex-Assistant Professor, Department of Obstetrics and Gynaecology, Medical College, Baroda who irrespective of his heavy clinical schedule spared his long hours of unselfish work to conduct fetal ultrasound examinations of all my subjects.

With deep gratitude, I acknowledge the critical contribution and invaluable help extended by my colleague Dr. H.M. Patel and for generously giving his time and expertise in helping me to carry out the most tedious manual calculations and statistical analysis of this research work.

With great pleasure, I express my gratitude towards my senior colleague Dr.(Mrs.) A.K. Pandya, Tutor in Physiology, who gave generously her time to read and critique the entire text and providing extremely valuable advice, from her perspective and also for her untiring, genuine efforts in meticulously compiling my Ph.D. thesis.

My heartfelt thanks are also due to my colleagues and friends Dr. Shruti, Dr. Hansa, Dr Swati .A, Dr Swati .M, Dr Shobha and Dr Sangita for their sympathetic and encouraging support.

I also express gratitude to all the teachers and resident doctors of Obstetrics and Gynaecology Department and Pediatric Department from whom I have received assistance during my study. I put on my record for appreciation for Mr. P. G. Sharma, Late Mr. J.K. Shah, Mr. Tulsibhai, Mr. Dayabhai, Mr. Ladbhai and Mr. Rameshbhai for having helped me directly or indirectly in successfully completing my work.

Lastly, I am thankful to all my subjects, who will probably never know of their pivotal role in this study, who have imparted knowledge- a debt, I cannot repay.
