

ACKNOWLEDGEMENTS

My research work towards Ph.D. degree was one of the most important project I have ever undertaken in my life. The journey has been quite enriching both at personal and professional level and I feel humbled to have come this far. God has been kind.

This mammoth task wouldn't have been possible to accomplish without support of my teachers, friends and family. I would like to mention a few names here.

*The first and foremost is my supervisor **Prof. Aruna Joshi** for agreeing to guide me and develop my scientific attitude. Her valuable guidance, balanced approach of giving me intellectual freedom and also nudge me to keep on track has been a backbone for this project. Apart from this she has always being soft spoken and kept me engaging in new ideas with enthusiasm which helped me throughout the journey.*

***Prof. G. Sandhya Kiran**, Head of the Department, for providing facilities in the Department. She always motivated me and provided insightful comments in spite of her busy schedules. **Prof. Arun Arya**, Ex-Head of the Department for allowing me to join for Ph.D. and always motivated me.*

***Dr. Neeta Shrivastava**, Assistant Director, B.V. Patel Pharmaceutical Education and Research Development (PERD) Centre, Ahmedabad, was my pillar of support as her valuable guidance and timely assistance helped throughout my research work. Her logical inputs and ideas made my work easier and I could do it in the best possible way. **Dr. Manish Nivsarkar**, Director of PERD Centre for permitting me to carryout works at their institute.*

***Dr. Poojadevi Sharma** for helping in initial studies on secondary metabolites and **Dr. Sonal Sharma** for supporting and sparing her valuable time to complete my work at PERD Centre. All the research scholars of **Pharmacognosy and Phytochemistry Lab** of PERD Centre, made me feel that I was one of them. I will always cherish the time spent at the lab.*

Prof. Rasheedunnisa Begum, Department of Biochemistry, allowed me to carry out the Ph.D. coursework and provided all the facilities at her lab. Dr. Mitesh Dwivedi and Dr. Naresh Laddha have been a source of motivation and helped me initially to gain knowledge in molecular techniques.

Dr. Archana Srivastava and Dr. Darshini Trivedi were there with me throughout my research journey. Ms. Swati has been a good friend, made my lab work joyful and her positive thoughts helped me to overcome difficulties in high time. She was always willing to help and with her support I finished my work in time.

My friend Hemanti who has been a source of encouragement as well as giving timely suggestions to improve my data analysis. Kushal, Neha, Sumit, Nidhi, Tanu and Sachet were always with me and due to their support this journey was so much enjoyable.

I sincerely acknowledge University Grants Commission (UGC), New Delhi, India, for providing me BSR Fellowship and this financial support helped me to perform my work comfortably.

Lastly, this acknowledgement is incomplete without mentioning my family because of whom I was able to achieve my goals. Due to the love, care, blessings and encouragement of my parents and believing in me I had the strength to complete my research work successfully. My elder brother and his wife always kept me cheerful and their lovely daughter Venus for those charming smiles that took away all my stress in a single glance.

Ashutosh Pathak
