

LIST OF TABLES

Table Nos.		Page Nos.
2.1	Different vernacular names of <i>C. phlomidis</i> used in India	12
2.2	Morphological, histological and powder characteristics of different parts of <i>C. phlomidis</i>	16
2.3	Ethnomedical uses of different parts of <i>C. phlomidis</i>	18-19
2.4	Different vernacular names of <i>N. stellata</i> used in India	34
2.5	Morphological, histological and powder characteristics of different parts of <i>N. stellata</i>	37
2.6	Ethnomedical uses of different parts of <i>N. stellata</i>	39-40
2.7	Nitrogen and protein content of <i>N. stellata</i> and <i>N. nouchali</i>	42
4.1.1	Foreign matter in <i>C. phlomidis</i> leaves	82
4.1.2	Proximate analysis of <i>C. phlomidis</i> leaves	88
4.1.3	Quantity of arsenic and heavy metals in <i>C. phlomidis</i> leaves	90
4.1.4	Microbial content of <i>C. phlomidis</i> leaves	91
4.1.5	Preliminary qualitative phytochemical screening of <i>C. phlomidis</i> extracts	92
4.1.6	Method validation parameters for quantification of adrenaline in <i>C. phlomidis</i> leaves	95
4.1.7	Precision and recovery studies data for quantification of adrenaline in <i>C. phlomidis</i> leaves	96
4.1.8	Calibration curve parameters for quantification of adrenaline in <i>C. phlomidis</i> extract	98
4.1.9	Method validation parameters for quantification of l-dopa in <i>C. phlomidis</i> leaves	100

4.1.10	Precision and recovery studies data for quantification of l-dopa in <i>C. phlomidis</i> leaves	101
4.1.11	Calibration curve parameters for quantification of l-dopa in <i>C. phlomidis</i> extract	103
4.1.12	Method validation parameters for quantification of lupeol in <i>C. phlomidis</i> leaves	105
4.1.13	Precision and recovery studies data for quantification of lupeol in <i>C. phlomidis</i> leaves	106
4.1.14	Calibration curve parameters for quantification of lupeol in <i>C. phlomidis</i> extract	108
4.1.15	Method validation parameters for quantification of β -sitosterol in <i>C. phlomidis</i> leaves	110
4.1.16	Precision and recovery studies data for quantification of β -sitosterol in <i>C. phlomidis</i> leaves	111
4.1.17	Calibration curve parameters for quantification of β -sitosterol in <i>C. phlomidis</i> extract	113
4.1.18	Validation parameters for quantification of β -carotene in <i>C. phlomidis</i> leaves	114
4.1.19	Calibration curve parameters for quantification of β -carotene in <i>C. phlomidis</i> extract	117
4.1.20	CHNOS analysis of CP I	126
4.1.21	CHNOS analysis of CP II	131
4.1.22	Method validation parameters for quantification of CP II	136
4.1.23	Precision and recovery studies data for quantification of CP II	136
4.1.24	Calibration curve parameters for quantification of CP II in <i>C. phlomidis</i> extract	137
4.1.25	CHNOS analysis of CP III	139

4.1.26	Changes in plasma glucose and insulin in control and experimental groups of <i>C. phlomidis</i>	144
4.1.27	Changes in hepatic hexokinase, glucose-6-phosphatase and liver glycogen levels in control and experimental groups of <i>C. phlomidis</i>	147
4.1.28	Changes in body weight in control and experimental group of <i>C. phlomidis</i>	150
4.1.29	Compounds identified by GCMS in UPFMCP of <i>C. phlomidis</i> leaves	158
4.1.30	% inhibition of PTP1B by extracts / fractions / compounds of <i>C. phlomidis</i>	163
4.1.31	LC ₅₀ values of extracts / fractions / compounds of <i>C. phlomidis</i>	168
4.1.32	Effects of <i>C. phlomidis</i> extracts / fractions / compounds on ADP induced platelet aggregation	172
4.1.33	% inhibition of acetylcholineesterase by extracts/fractions/compounds of <i>C. phlomidis</i>	180
4.2.1	Foreign matter in <i>N. stellata</i> leaves	183
4.2.2	Proximate analysis of <i>N. stellata</i> leaves	188
4.2.3	Elemental analysis of <i>N. stellata</i> leaves	189
4.2.4	Preliminary qualitative phytochemical screening of <i>N. stellata</i> extracts	190
4.2.5	Method validation parameters for quantification of lupeol in <i>N. stellata</i> leaves	191
4.2.6	Calibration curve parameters for quantification of lupeol in <i>N. stellata</i> extract	193
4.2.7	Method validation parameters for quantification of β -sitosterol in <i>N. stellata</i> leaves	194

4.2.8	Calibration curve parameters for quantification of β -sitosterol in <i>N. stellata</i> extract	196
4.2.9	Validation parameters for quantification of β -carotene in <i>N. stellata</i> leaves	197
4.2.10	Calibration curve parameters for quantification of β -carotene in <i>N. stellata</i> extract	199
4.2.11	Validation parameters for quantification of oleanolic acid in <i>N. stellata</i> leaves	200
4.2.12	Calibration curve parameters for quantification of oleanolic acid in <i>N. stellata</i> extract	202
4.2.13	Validation parameters for quantification of betulinic acid in <i>N. stellata</i> leaves	203
4.2.14	Calibration curve parameters for quantification of betulinic acid in <i>N. stellata</i> extract	206
4.2.15	Validation parameters for quantification of gallic acid in <i>N. stellata</i> leaves	207
4.2.16	Calibration curve parameters for quantification of gallic acid in <i>N. stellata</i> extract	209
4.2.17	Changes in plasma glucose and insulin in control and experimental groups of <i>N. stellata</i>	210
4.2.18	Changes in hepatic hexokinase, glucose-6-phosphatase and liver glycogen levels in control and experimental groups of <i>N. stellata</i>	213
4.2.19	Changes in body weight in control and experimental group of <i>N. stellata</i>	215
4.2.20	% inhibition of PTP1B by extracts / fractions / compounds of <i>N. stellata</i>	222
4.2.21	LC ₅₀ values of extracts / fractions / compounds of <i>N. stellata</i>	224

4.2.22	Effects of <i>N. stellata</i> extracts / fractions / compounds on ADP induced platelet aggregation	225
4.2.23	% inhibition of acetylcholinesterase by extracts / fractions / compounds of <i>N. stellata</i>	227
