

LIST OF GRAPH

Graph no.	Title	Page No
4.1.1	Morphometric linear measurements of patella bone in right sided and left sided of knee	138
4.1.2	Morphometric linear measurements of patella bone in males and females	139
4.2.1	Morphometric linear measurements of distal end of femur in right sided and left sided of knee	143
4.2.2	Morphometric linear measurements of distal end of femur in males and females	143
4.3.1	Morphometric linear measurements of upper end of tibia in right sided and left sided knee	148
4.3.2	Morphometric linear measurements of upper end of tibia of in males and females.	148
4.4.1	Incidence of different shapes of medial menisci of knee	151
4.4.2	Incidence of different shapes of lateral menisci of knee	152
4.5.1	Morphometric measurements of medial menisci of knee in males and females	155
4.5.2	Morphometric measurements of lateral menisci of knee in right sided and left sided	157
4.6	Morphometric linear measurements of patellar ligament of knee in right sided, left sided, in males and females	159
4.7	Morphometric linear measurements of cruciate ligament of knee in right sided, left sided, in males and females	161
4.8.1	Morphometric linear measurements of superficial medial collateral ligament of knee in right sided left sided, in males and females.	164
4.8.2	Morphometric linear measurements of lateral collateral ligament of knee in right sided left sided, in males and females.	166
4.9	Incidence of presence and absence of transverse ligament of knee.	168
4.13	Showing various individual structures in numbers and percentage contributing in forming pes anserinus.	179

5.1.1	Comparison of mean length of patella by different authors	186
5.1.2	Comparison of mean width of patella by different authors	187
5.1.3	Comparison of mean thickness of patella by different authors	188
5.1.4	Comparison of mean width of lateral articular facet of patella by different authors	190
5.1.5	Comparison of mean width of lateral articular facet of patella by different authors	190
5.2.1	Comparison of mean bicondylar width of femur by different authors	195
5.2.2	Comparison of mean medial femoral condyle antero-posterior diameter by different authors	196
5.2.3	Comparison of mean medial femoral condyle transverse diameter by different authors	197
5.2.4	Comparison of mean lateral femoral condyle antero-posterior diameter by different authors	198
5.2.5	Comparison of mean lateral femoral condyle transverse diameter by different authors	199
5.2.6	Comparison of mean Intercondylar notch width of femur by different authors.	200
5.2.7	Comparison of mean Intercondylar notch length of femur by different authors.	201
5.3.1	Comparison of mean medial tibial condyle antero-posterior diameter by different authors	204
5.3.2	Comparison of mean lateral tibial condyle antero-posterior diameter by different authors	204
5.3.3	Comparison of mean medial tibial condyle transverse diameter by different authors	205
5.3.4	Comparison of mean medial tibial condyle transverse diameter by different authors	205
5.3.5	Comparison of mean antero-posterior measurement of intercondylar area by different authors	207
5.3.6	Comparison of mean antero-posterior measurement of anterior intercondylar area by different authors	207
5.3.7	Comparison of mean antero-posterior measurement of posterior intercondylar area by different authors	208

5.5.1	Comparison of mean length of medial and lateral menisci in present study	212
5.5.2	Comparison of mean width (anterior one-third) of medial and lateral menisci by different authors	213
5.5.3	Comparison of mean width (middle one-third) of medial and lateral menisci by different authors	213
5.5.4	Comparison of mean width (posterior one-third) of medial and lateral menisci in present study	214
5.5.5	Comparison of mean thickness (anterior one-third) of medial and lateral menisci by different authors	214
5.5.6	Comparison of mean thickness (middle one-third) of medial and lateral menisci by different authors	215
5.5.7	Comparison of mean thickness (posterior one-third) of medial and lateral menisci by different authors	215
5.6.1	comparison of mean length of patellar ligament by different authors	219
5.6.2	Comparison of mean width of patellar ligament by different authors	219
5.6.3	Comparison of mean thickness of patellar ligament (proximal part) by different authors	219
5.6.4	Comparison of mean thickness of patellar ligament (distal part) by different authors	219
5.8	Comparison of mean length of lateral collateral ligament by different authors	225
5.11	Prevalence of Os fabella (in %) by different authors	229
5.13.1	Comparison of morphological variants of tendons of pes anserinus by different authors	235
5.13.2	Comparison of Convergence pattern of Pes anserinus by other authors	236
5.13.3	Comparison of frequency of site of insertion of the pes anserinus by different authors	238
