

LIST OF TABLES

Table No.	Legend	Page No.
Table: 3.1	Branches of the Anterior trunk and the Posterior trunk of the Internal Iliac artery in Male & Female	11
Table: 5.1	Origin of internal iliac artery at various vertebral levels	98
Table: 5.2	Distance of internal iliac artery's origin to the midsagittal plane	100
Table: 5.3	Comparison of Range and Mean distance of internal iliac artery's origin to the midsagittal plane	102
Table: 5.4	Relation of internal iliac artery with sacroiliac joint	103
Table: 5.5	Length of internal iliac artery	104
Table: 5.6	Comparison of Range and Mean Length of internal iliac artery of right and left, Males and Female	105
Table: 5.7	Diameter of internal iliac artery	106
Table: 5.8	Comparison of minimum, maximum and average diameter of right and left, Males and Female internal iliac arteries	107
Table: 5.9	Various patterns of Termination of internal iliac artery	108
Table: 5.10	Variations in the level of division of internal iliac artery	111
Table: 5.11	According to Adachi Classification of branching patterns of internal iliac artery	113
Table: 5.12	Frequencies of different origin of Obturator artery	117
Table: 5.13	Different modes of origin of Inferior gluteal artery	121
Table: 5.14	Incidence of variation in the origin of the Iliolumbar artery.	123
Table: 5.15	Number of Iliolumbar artery present in the pelvic half	125
Table: 5.16	Various origins of the Internal Pudendal artery	127
Table: 5.17	Number of Superior vesical artery arising from internal iliac artery	129
Table: 6.1	Origin of internal iliac artery at various vertebral levels from various authors	134

Table: 6.2	Relation of internal iliac artery with sacroiliac joint from various authors	136
Table: 6.3	Frequencies of Length of internal iliac artery reported by different studies	138
Table: 6.4	Length of internal iliac artery from various authors	140
Table: 6.5	Comparison of the length (mm) of the left and right internal iliac arteries in embalmed and unembalmed specimens. Adapted from Bleich et al. (2007)	141
Table: 6.6	Comparison of the length (mm) in different ethnic groups	142
Table: 6.7	Diameter of internal iliac artery from various authors	144
Table: 6.8	The distance of the level of division of the internal iliac artery in respect to greater sciatic foramen reported by various studies	147
Table: 6.9	Various patterns of Termination of internal iliac artery	149
Table: 6.10	Incidence of variations in branching pattern of internal iliac artery from different authors according to Adachi's 1928 classification system into 5 main type	152
Table: 6.11	Frequency reported by various authors on the origin of obturator artery from the anterior division of internal iliac artery	155
Table: 6.12	Incidence of obturator artery originating from the posterior division of internal iliac artery by various authors	156
Table: 6.13	Frequency of obturator artery originating from the external iliac artery by different authors	157
Table: 6.14	Various mode of origin of iliolumbar artery by different authors.	160
Table: 6.15	Number of Iliolumbar artery present in the pelvic half reported by various Authors	161
Table: 6.16	Number of Superior vesical artery arising from internal iliac artery reported by various authors	163
