

TABLE OF CONTENTS

Chapter No.	Name of Chapter	Page Number
Chapter I	<i>Introduction</i>	1-12
Chapter II	<i>Review of Literature & Objectives</i>	13-19
Chapter III	<i>Material and Methods</i>	20-32
	3.1). <i>Selection of plant species:</i>	
	3.2). <i>Field visits and collection of samples:</i>	
	3.3). <i>Processing of the Samples in the Field and Laboratory:</i>	
	3.3.1). <i>Killing and fixation:</i>	
	3.3.2). <i>Microscopic preparations:</i>	
	A) . <i>Rotary microtome sectioning:</i>	
	B) . <i>Sliding microtome sectioning:</i>	
	3.3.3). <i>Staining and mounting:</i>	
	3.3.4). <i>Maceration, measurements and analysis:</i>	
	3.3.5). <i>Macro and Micro photographs:</i>	
Chapter IV	<i>Results</i>	33-146
	4.1). <i>Stem conformation (outline) in transverse view:</i>	
	4.2). <i>Structure of young stem and initiation of primary growth:</i>	
	4.2.1). <i>Regular and Variant Primary Growth</i>	
	4.2.2). <i>Development of the intraxylary phloem:</i>	
	4.2.3). <i>Gross structure of the secondary xylem:</i>	
	4.2.4). <i>Transition from self-supporting to climbing habit:</i>	
	4.3). <i>Regular and Variant Secondary Growth</i>	
	4.3.1). <i>Regular secondary growth:</i>	
	4.3.1.1). <i>Stem conformation (outline) in transverse view:</i>	
	4.3.1.2). <i>Development of lianescent characteristics of the secondary xylem:</i>	
	4.3.1.3). <i>Formation of the secondary xylem in plates:</i>	
	4.3.1.4). <i>Abundance of parenchyma (both axial and ray):</i>	
	4.3.2). <i>Variant secondary growth:</i>	

	4.3.2.1). <i>Formation of successive cambia:</i>	
	4.3.2.1A). <i>Initiation of successive cambia from pericyclic parenchyma or derivatives:</i>	
	4.3.2.1B). <i>Initiation of neo-formed vascular cylinders from dilating phloem ray parenchyma:</i>	
	4.3.2.1C). <i>Initiation of successive cambia from cortical parenchyma:</i>	
	4.3.2.1D). <i>Development of functionally inverse cambia:</i>	
	4.3.2.2). <i>Proliferation of xylem rays and formation of ray cambium:</i>	
	4.3.2.3). <i>Development of interxylary phloem:</i>	
	4.3.2.4). <i>Development of intraxylary phloem and intraxylary phloem cambium:</i>	
	4.3.2.5). <i>Development of phloem wedges (furrowed xylem) and lobbed stems:</i>	
	4.4). <i>Serjania circumvallata</i> Radlk. and <i>S. mexicana</i> (L.) Willd.: A special case of variant growth:	
	4.5). <i>Structure of secondary xylem:</i>	
Chapter V	<i>Discussion</i>	147-166
Chapter VI	<i>Summary and Conclusions</i>	167-177
Chapter VII	<i>References</i>	178-210
	<i>List of Publications</i>	211-212
