LIST OF FIGURES

Figure no.	Title	Page no.
2.1.1	Projection of old age population worldwide	12
2.2.1	World-wide prevalence of Diabetes Mellitus	14
2.2.2	Top ten countries showing prevalence of Diabetes mellitus	14
2.2.3	% Prevalence of Diabetes in different states	15
2.13.1	Chia seeds	54
2.13.2	Niger seeds	55
2.13.3	Fenugreek seeds	55
2.13.4	Garden Cress seeds	56
2.13.5	Sunflower seeds	56
2.13.6	Flax seeds	57
2.14.1	Pumpkin	58
2.14.2	Pumpkin seeds	60
3.2a.1	Experimental design for the development of pumpkin seed incorporated recipes	82
3.2b.2	Experimental plan for determining glycaemic index	85
3.3.1	Compliance card	90
3.3.2	Experimental design for phase III	92
4.2b.3	Blood glucose response of various recipes compared with Glucose	138-140
4.3.3	Prevalence of obesity among the type 2 elderly diabetic subjects	147
4.3.5	Number of type 2 elderly diabetic subjects showing family history	149
4.3.11.	Percentage of substance use by elderly type 2 diabetic subjects	156
4.3.14	Duration of Diabetes Mellitus	158
4.3.15	Symptoms reported by elderly type 2 diabetic subjects	159
4.3.18.	Causes of Diabetes as per elderly type 2 diabetic Subjects	161
4.3.24.1	Overall shifts and reduction in FBS levels	173
4.3.24.2	Overall shifts and reduction in HbA1C levels	174
4.3.24.3	Overall shifts and reduction in TC levels	176
4.3.24.4	Overall shifts and reduction in LDL levels	177
4.3.25.1	Impact of pumpkin seed supplementation on Blood pressure of group 1 elderly type 2 diabetic subjects	181
4.3.25.2	Impact of pumpkin seed supplementation on Blood pressure of group 2 elderly type 2 diabetic subjects	181
4.3.26.1	Correlation between BMI and Fasting Blood Sugar levels of experimental group subjects on post intervention	182
4.3.26.2	Correlation between BMI and Fasting Blood Sugar levels of control group subjects on post intervention	183
4.3.27.1	Correlation between BMI and HbA1C levels of experimental group subjects on post intervention	184
4.3.27.2	Correlation between BMI and HbA1C levels of control group subjects on post intervention	185
