

List of Tables

<i>Table 2.1 Parameters vide equation (2.55)</i>	47
<i>Table 3.1 Literature survey relevant to present work (IE - ionisation energy)</i>	69
<i>Table 3.2 Molecular properties of present targets</i>	71
<i>Table 3.3 Ratio of Q_{ion} for deuterated and corresponding protonated molecules</i>	83
<i>Table 3.4 Dipole polarisability (α)</i>	86
<i>Table 3.5 Ionisation Energies (IE) [21]</i>	88
<i>Table 4.1 Molecular properties</i>	99
<i>Table 4.2 Literature survey for Furfural and para-Benzoquinone</i>	109
<i>Table 4.3 Target properties of Furfural and para-Benzoquinone</i>	109
<i>Table 4.4 Comparison of the GWP and dielectric strength of SF_6, C_3F_5N and C_4F_7N</i>	117
<i>Table 4.5 Literature survey on electron impact study of fluoronitriles</i>	118
<i>Table 4.6 Molecular properties and predicted α</i>	127
<i>Table 4.7 Estimated dielectric constant (ϵ)</i>	130
<i>Table 5.1 Literature survey</i>	143
<i>Table 5.2 Molecular characteristics</i>	143
<i>Table 5.3 Predicted polarisability α ($\text{\AA}^3$)</i>	151
<i>Table 5.4 Computed dielectric constants (ϵ)</i>	152
<i>Table 5.5 Molecular parameters</i>	153
<i>Table 5.6 Literature study on IMFP of DNA constituents</i>	154
<i>Table 5.7 Mean excitation energies of the target</i>	165
<i>Table 6.1 Literature survey on e^- - CH_2F_2 scattering study</i>	185
<i>Table 6.2 Various target properties of CH_2F_2 calculated using Quantemol-N</i>	187
<i>Table 6.3 Properties of CH_2F_2 [33]</i>	188
<i>Table 6.4 Vertical excitation energies for all states of CH_2F_2</i>	188
<i>Table 6.5 Literature survey on electron collision study of CH_3F for the reported energy range</i>	199
<i>Table 6.6 Various target properties of CH_3F calculated using Quantemol-N</i>	200
<i>Table 6.7 Vertical excitation energies for all states of CH_3F</i>	201
<i>Table 6.8 Properties of CH_3F [33]</i>	202
<i>Table 7.1 Present electron collision study for various molecules</i>	214
