

# **ACKNOWLEDGEMENT**

In this journey of research I had come across number of people who helped and travelled with me to achieve this ambition of my life. Therefore, for this achievement of mine I should express my sense of gratitude towards those persons who unconditionally supported, helped and encouraged me in all situations.

I am highly thankful to Almighty for blessing me and giving me strength, energy and patience to overcome all the difficulties and reach to this ambition.

I sincerely express my deep sense of gratitude to my guide Dr. Dharmendra G. Shah for his untiringly support and sincere guidance. Without his inspiration, encouragement, help and guidance it would not have been possible to carry out this research. I am very much thankful to him for introducing me to wonderful world of mangrove. His innovative suggestions, critical comments and fruitful discussions helped me a lot in my research as well as in improving the thesis.

I express my gratitude towards Sir Late Prof. Nikhil Desai, Ex. Head Department of Geology and Ex. Dean (Retired) Faculty of Science for his continuous encouragement and guidance during this work. I learned the concepts of geomorphology and intricacies of coast from him through his meticulous ways of pursuing various aspects of science. I am grateful to him for extending my knowledge from plant science to earth science.

I am thankful to Prof. Arun Arya and Prof. Sandhya K. Garge who remained as Head, Department of Botany during initial and at the time of completion of this work respectively for providing me all the required facilities in the department.

I express my heartiest thanks and appreciation to Prof. Atul Joshi, Department of Geology for their thorough guidance in interpretation of results of sediment analysis. I am also thankful to Prof. B. S. Deota for encouraging me to work hard. I thank Prof. L.S. Chamyal, Head Department of Geology for providing all the facilities available to his command.

I am indebted to Dr. H. B. Chauhan, Scientist- SF at Space Application Centre (SAC), ISRO, Ahmedabad for his concern, scientific motivation, encouragement and for

providing all necessary facilities and training required to carry out land use land cover analysis.

I am very much grateful to Dr. P. S. Nagar, Department of Botany for his help in identification of plants. I express my gratitude to Dr. Kishore Rajput for his continuous motivation and encouragement. I am also thankful to Dr. Punita Parikh for her inspiration and providing lab facilities.

I am grateful to all my Botany teachers who built foundation of this subject in me.

I am very much thankful to Mrs. Swati N. Desai and Mrs. Shruti D. Shah for their continuous motivation and their moral support throughout my work. I express my gratitude to Shruti Madam for helping me in identification of plants.

I am very much thankful to Dr. Sweta Bhatt (Sweta didi) who untiringly supported, helped me, understood me and encouraged me in all situations. She was always there to listen and answer my queries. She literally stood beside me like an elder sister and taught me many things. Thanks didi for your moral support and being with me.

I gratefully acknowledge the financial support received from Space Application Centre (SAC), ISRO, Ahmedabad, and Government of Gujarat in the form of research projects sanctioned to Dr. Dharmendra G. Shah for carrying out the present study.

I also acknowledge support and cooperation provided by all the non-teaching staff members of Department of Botany as well as Geology.

I am extremely thankful to Mr. Deepak Tadvi, Mr. Rakesh Gujar and Ms. Rachna Suthar for their help during the field visits. I thanks Mr. Rakesh Gujar for helping me at many points in this research work. I am grateful to Ms. Rinku Desai for helping me in identification of grass and to Mr. Deepak Tadvi and Ms. Mittal Bhatt for helping me in identification of plants. Help of Mr. Rahul Parikh, Mr. Roshan Parmar and Mr. Karan Rana is highly appreciable.

I am lucky to have good friends who have been constantly encouraging, motivating and cheering me in all situations. I extend my thanks to Mrs. Shirali Shah, Ms. Darshini Trivedi, Ms. Usha Joshi and Ms. Ashwini Mudaliar.

This acknowledgment would not be complete without mentioning the pain staking efforts and patience of my families. No words are adequate to express my indebtedness to my mother in-law and to my parents for their support, blessings and good wishes. I owe this thesis to my parents, my in-laws and other family members who always stood by me and provided strength in pursuing this work. I express my deep sense of gratitude to my spouse Shripad, for his love, understanding, tremendous moral support and help he extended to me all the time. This achievement of my life would not be possible without his support and cooperation throughout this study.

Lastly, I express my hearty thanks to those whom I might have missed to mention by name, who helped directly or indirectly and co operated me a lot in completion of this Ph.D. research work.
