

ACKNOWLEDGMENTS

This study would not have seen the light of the day without the guidance, expert advice and constant monitoring of Dr Jayraj Jadeja, Reader in Marketing, Faculty of Management Studies, The M S University of Baroda and Prof. Mayank Dholakia, Head & Dean, Faculty of Management Studies, The M S University of Baroda.

The response of the medical profession was unexpectedly overwhelming. They co-operated whole-heartedly despite the time constraint they face all the time, in their profession. Medical representatives and marketing managers of various pharmaceutical organizations diligently responded. But for their co-operation and support, this study would not have materialized. I express my heartfelt thanks to all the participants.

I am deeply indebted to M/s Redkine Pharmaceuticals Pvt Ltd., Baroda and their field staff for the help rendered for data collection. But for their help, such voluminous data would not have been collected.

I am grateful to Dr R G Kothari, Head, Centre of Advance Studies in Education, The M S University of Baroda, for reviewing the questionnaire formats and extending helpful tips. Professor Shri Hari, Head, Department of Statistics, Faculty of Science, The M.S University of Baroda extended valuable help by guiding me through the intricacies of the statistical analysis for meaningful interpretation. I express my gratefulness to Prof. Shri Hari, but for whom this study would not be complete.

I feel a sense of obligation to Shri Bhadresh Vyas and Shri Prakash Rathod, who fed the data to the computers and compiled & tabulated it for rendering it suitable for computer analysis. I am thankful to Mr M R L Sundar for proofreading the text of the study. Last but not the least, I am thankful to my wife, Rita, who tolerated me, without complaint, during my long hours of study.

B.R.Shah
