

ACKNOWLEDGEMENTS

To begin expressing my gratefulness in completing this work, I start with, thanking the University Grants Commission whose financial assistance for a tenure of five years has enabled me to take up this assignment.

I express by deep gratitude in the first place to my supervisor Dr. R. T. Parikh, who has rendered his assistance by way of his astute judgement and through insight into the every aspect of the problem and by offering his informed opinion on every critical matter. This work would never have been concluded but for his whole hearted support and active co-operation. During this long arduous tenure his help has extended even to the extramural spheres, in crisis; by way of counseling. I feel short of vocabulary on this occasion to express my gratefulness.
