
TABLE OF CONTENTS

DEDICATION	1
ACKNOWLEDGMENTS	3
ABSTRACT	4
TABLE OF CONTENTS	11
LIST OF FIGURES	13
LIST OF TABLES	18

1. Introduction	19
1.1 Bulk Power Transmission	19
1.2 Series-compensation Technique and its Advantages	21
1.3 Overview of Principles of Distance protection for Transmission Lines	24
1.4 The relaying Problems associated with Series Capacitor Compensation	31
1.5 Work Objectives	41
1.6 Organization of the Thesis	42
2. Fourier and Wavelet Transforms	43
2.1 Time and Frequency Representation of Signals	43
2.2 Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT)	45
2.3 Introduction to wavelet Transform (WT)	48
2.4 Wavelet and Multi-resolution Analysis (MRA) Mathematical Representation	52
2.5 Wavelet Transform and Multi-level Representation	55
2.6 Review of Wavelet Applications in Power systems	64
2.7 Summary	66

3. A Current Controlled Harmonic Index based Protection Scheme for Series Compensated Transmission Lines	68
3.1 Introduction	68
3.2 Protective Equipments for Series Capacitors	69
3.3 The Proposed Scheme	73
3.4 Working of the Scheme	76
3.5 Simulation Studies	77
3.6 Summary of Simulation Results	106
4. Current Differential Pilot Relaying (CDPR) Protection Technique for Series Compensated Lines using Wavelet Transform (WT)	109
4.1 Basic Current Differential Relaying	109
4.2 Current Differential Pilot Relaying Protection for Transmission lines	111
4.3 The Proposed Scheme	112
4.4 Working of the Scheme and Simulation Studies	116
4.5 Summary of Simulation Results	141
5. Fault Generated High Frequency Transients based Non-Unit Protection Technique for Series Compensated Transmission Lines using Wavelet Transforms (WT)	143
5.1 Introduction and Background	143
5.2 The Proposed Scheme and its working	145
5.3 Performance Evaluation by Simulation Studies	154
5.4 Summary of Simulation Results	187
6. Conclusion	189
