

L I S T O F T A B L E S

<u>Table</u>	<u>Description</u>	<u>Page</u>
--	Localities referred in the text	Before text
I.1	General stratigraphy of the Saurashtra Peninsula (After Shrivastava, 1963)	15
III.1	Modes of occurrences	48
V.1	Composition of Quaternary carbonate deposits of Saurashtra	147
V.2	Relative population of major constituents in beach rocks and miliolite limestones of Saurashtra	172-73
V.3	Table showing frequency of various allochems in beach rocks and miliolite limestones of Saurashtra	178-79
V.4	Table showing frequency of various constituents in stabilised sand dunes	181
V.5	Insoluble residues of Quaternary carbonate deposits of Saurashtra	183-84
V.6	X-Ray diffraction data of Quaternary carbonate deposits of Saurashtra	193
V.7	T L glow peak temperature and intensities of Quaternary carbonate deposits of Saurashtra	197
V.8	Average length of bioclasts and peloids in miliolites along section A-A'	201
V.9	Average length of bioclasts and peloids in miliolites along section B-B'	202
V.10	Average length of bioclasts and peloids in miliolites along section C-C'	203
V.11	Statistical parameters from granulometric analyses of stabilised sand dunes of Saurashtra	207
VI.1	Schematic history of diagenesis of the Quaternary carbonate deposits of Saurashtra	247

VII.1	Climatic stages during Quaternary glacio-eustatic changes in Central North America and Alpine region	250
VII.2	Broad summary of dated Quaternary carbonate deposits of Saurashtra	255
