### Chapter 1 Introduction

|       |                                                                         |    |
|-------|-------------------------------------------------------------------------|----|
| 1.1   | Introduction                                                            | 1  |
| 1.2   | Ion Beam in Material Science                                            | 2  |
| 1.2.1 | Material Analysis                                                       | 3  |
| 1.2.2 | Material Modification                                                   | 4  |
| 1.2.3 | Radiation Damage Simulation                                             | 5  |
| 1.3   | Polymer                                                                 | 8  |
| 1.3.1 | Historical Background of Polymer                                        | 9  |
| 1.3.2 | Various Types of Polymer                                                | 11 |
| 1.4   | Structure and Morphology of Polymer                                     | 15 |
| 1.4.1 | Crystalline Polymer                                                     | 17 |
| 1.4.2 | Amorphous Polymer                                                       | 21 |
| 1.5   | Application of Polymers                                                 | 27 |
| 1.6   | Impact of Polymers on Present Day Technology                            | 32 |
| 1.7   | Radiation Effects on Polymers                                           | 35 |
| 1.8   | Ion Beam Modification of Polymeric Materials:<br>Fundamental Principles | 42 |
| 1.9   | Present Work                                                            | 54 |
|       | References                                                              | 60 |

### Chapter 2 Instrumentation and Technique

|       |                            |    |
|-------|----------------------------|----|
| 2.1   | Introduction               | 65 |
| 2.2   | Irradiation Facility       | 65 |
| 2.2.1 | The Main Magnet            | 67 |
| 2.2.2 | The Oscillator             | 70 |
| 2.2.3 | The Ion Source             | 70 |
| 2.2.4 | The Deflector              | 71 |
| 2.2.5 | Vacuum System              | 71 |
| 2.2.6 | Control System             | 72 |
| 2.3   | Characterization Technique | 74 |
| 2.3.1 | IR Spectroscopy            | 74 |
| 2.3.2 | Optical Microscopy         | 77 |
| 2.3.3 | Vickers' Microhardness     | 79 |
| 2.3.4 | AC Electrical Parameters   | 81 |

|                        |    |
|------------------------|----|
| 2.3.5 Thermal analysis | 88 |
| Reference              | 94 |

## Chapter 3 Experimental Details

|                                                           |     |
|-----------------------------------------------------------|-----|
| 3.1 Introduction                                          | 95  |
| 3.2 Important Properties of Polymers Undertaken for study | 96  |
| 3.2.1 Polypropylene (PP)                                  | 96  |
| 3.2.2 Polyimide/Kapton (PI)                               | 97  |
| 3.2.3 Polyether terephthalate (PET)                       | 99  |
| 3.2.4 Polyether sulfone (PES)                             | 101 |
| 3.2.5 Polycarbonate/Makrofol-DE (PC)                      | 103 |
| 3.2.6 Blend Polymer (PVC+PET)                             | 104 |
| 3.3 Irradiation and Measurements                          | 109 |
| 3.3.1 Target Preparation                                  | 109 |
| 3.3.2 Thickness Measurement                               | 110 |
| 3.3.3 Calculation of Range and Energy Loss by SRIM-Code   | 111 |
| 3.3.4 Proton Irradiation                                  | 114 |
| 3.4 Characterizations of Polymers                         | 115 |
| 3.4.1 FTIR Spectroscopy                                   | 116 |
| 3.4.2 Optical Microscope                                  | 118 |
| 3.4.3 Vickers' Microhardness Tester                       | 118 |
| 3.4.4 LCR Meter                                           | 121 |
| 3.4.5 Thermogravimetric Analysis                          | 123 |
| 3.4.6 Differential Scanning Calorimetry                   | 124 |
| Reference                                                 | 127 |

## Chapter 4 Results and Discussion

|                            |     |
|----------------------------|-----|
| 4.0 Results and Discussion | 128 |
| 4.1 Polypropylene (PP)     | 128 |
| 4.1.1 Structural Analysis  | 130 |
| 4.1.2 Electrical Property  | 131 |
| 4.1.3 Thermal Studies      | 135 |
| 4.1.3.1 TGA Analysis       | 135 |
| 4.1.4 Surface Morphology   | 137 |
| 4.1.5 Conclusion           | 137 |

|         |                                     |     |
|---------|-------------------------------------|-----|
| 4.2     | Polyimide/Kapton (PI)               | 139 |
| 4.2.1   | Structural Analysis                 | 141 |
| 4.2.2   | Electrical Property                 | 142 |
| 4.2.3   | Thermal Studies                     | 145 |
| 4.2.3.1 | TGA Analysis                        | 145 |
| 4.2.3.2 | DSC Analysis                        | 146 |
| 4.2.4   | Mechanical Property (microhardness) | 147 |
| 4.2.5   | Surface Morphology                  | 149 |
| 4.2.6   | Conclusion                          | 149 |
| 4.3     | Polyethylene terephthalate (PET)    | 151 |
| 4.3.1   | Structural Analysis                 | 153 |
| 4.3.2   | Electrical Property                 | 155 |
| 4.3.3   | Thermal Studies                     | 158 |
| 4.3.3.1 | TGA Analysis                        | 158 |
| 4.3.3.2 | DSC Analysis                        | 159 |
| 4.3.4   | Mechanical Property (microhardness) | 160 |
| 4.3.5   | Surface Morphology                  | 163 |
| 4.3.6   | Conclusion                          | 163 |
| 4.4     | Polyether sulfone (PES)             | 166 |
| 4.4.1   | Structural Analysis                 | 167 |
| 4.4.2   | Electrical Property                 | 168 |
| 4.4.3   | Thermal Studies                     | 171 |
| 4.4.3.1 | TGA Analysis                        | 171 |
| 4.4.3.2 | DSC Analysis                        | 172 |
| 4.4.4   | Mechanical Property (microhardness) | 172 |
| 4.4.5   | Surface Morphology                  | 174 |
| 4.4.6   | Conclusion                          | 174 |
| 4.5     | Polycarbonate/Makrofol-DE (PC)      | 177 |
| 4.5.1   | Structural Analysis                 | 178 |
| 4.5.2   | Electrical Property                 | 179 |
| 4.5.3   | Thermal Studies                     | 182 |
| 4.5.3.1 | TGA Analysis                        | 182 |
| 4.5.3.2 | DSC Analysis                        | 184 |
| 4.5.4   | Mechanical Property (microhardness) | 184 |
| 4.5.5   | Surface Morphology                  | 188 |
| 4.5.6   | Conclusion                          | 188 |
| 4.6     | Blend Polymer (PVC+PET)             | 190 |
| 4.6.1   | Structural Analysis                 | 190 |
| 4.6.2   | Electrical Property                 | 192 |
| 4.6.3   | Thermal Studies                     | 195 |

|                                           |     |
|-------------------------------------------|-----|
| 4.6.3.1 TGA Analysis                      | 195 |
| 4.6.3.2 DSC Analysis                      | 196 |
| 4.6.4 Mechanical Property (microhardness) | 196 |
| 4.6.5 Surface Morphology                  | 199 |
| 4.6.6 Conclusion                          | 200 |
| Reference                                 | 203 |

## Chapter 5 Summary and Conclusion

|                        |     |
|------------------------|-----|
| Summary and Conclusion | 205 |
| Future plan of work    | 212 |
