

TABLE OF CONTENTS

<u>CONTENTS</u>	<u>PAGE NO.</u>
Abstract	(i) - (iv)
A. INTRODUCTION	v - vi
B. REVIEW OF LITERATURE	vii - xiv
(1) Definition of anemia and criteria for assessment.	xv
(2) Diagnostic parameters for iron deficiency (and anemia)	xvi
(3) Prevalence of anemia in school children.	xvii
(4) Deleterious effects of anemia	xviii
(5) Behavioral consequences of iron deficiency anemia	xix
(6) Impact of iron deficiency on Physical Work Capacity	xx
(7) Iron deficiency and growth	xxi
(8) Prevention of iron deficiency anemia	xxii
C. MATERIALS AND METHODS	xxiii - xxv
A) General Objectives of the study	xxvi
B) Specific Objectives of the study	xxvii
C) Sample selection	xxviii
D) Experimental design	xxix
E) Dosage level and duration of dosing of the hematinic compound	xxx
F) Parameters and techniques used for data collection	xxxi
G) Statistical analysis	xxxii

<u>CONTENTS</u>	<u>PAGE NO.</u>
D. RESULTS AND DISCUSSION	116
I. Iron status of the study population	116
1) Prevalence of anemia	117
2) Impact of Fe supplementation on Hb status.	121
3) Impact of Fe supplementation on Fe ²⁺ status.	123
II. Impact of Fe supplementation on Cognitive Function (CF) tests.	131
1) Impact of supplementation on the CF test scores of the total study population.	131
2) Relationship between the measures of iron status and CF test scores.	135
3) Impact of supplementation on CF test scores in younger and older subjects.	167
III. Impact of Fe supplementation on Physical Work Capacity (PWC)	171
1) Impact of Fe supplementation on selected parameters of PWC in underprivileged school girls.	171
2) Relationship between measures of Fe status and PWC.	200
3) Impact of Fe supplementation on anemic and non-anemic subjects.	210

<u>CONTENTS</u>	<u>PAGE NO.</u>
4) Impact of Fe supplementation on younger and older subjects.	239
IV. Impact of Fe supplementation on growth	273
E. SUMMARY AND CONCLUSION	283 - 300
F. BIBLIOGRAPHY	301 - 312
G. APPENDICES	313 - 350
