

CONTENTS

1.	INTRODUCTION	
1.	MONITORING OF ENVIRONMENT	1
1.1	REMOTE SENSING	1
1.1.1	Historical Perspective	1
1.1.2	General Aspects	5
1.1.2.1	Definition	5
1.1.2.2	Principle	5
1.1.2.3	Requirements	6
1.1.2.3.1	Electromagnetic Radiations	6
1.1.2.3.2	Sensors	7
1.1.2.3.3	Platforms	14
1.1.2.4	Remote Sensing Resolution Consideration	14
1.1.3	Data Acquisition, Transmission and Interpretation	15
1.1.4	Remote Sensing in India	17
1.1.5	Advantages and Limitations	18
1.1.6	Applications	19
1.2	IMPACT OF SALINITY ON SOIL AND VEGETATION	20
1.2.1	Soil Factor	20
1.2.1.1	Salinity Status in India	21
1.2.2	Classification and Grouping System of Salt Affected Soils	24
1.2.3	Crop Response to Salinity	26
1.3	Relevance of Remote Sensing to Salinity and Vegetational Mapping and Monitoring	29
1.4	SIGNIFICANCE AND OBJECTIVE OF THE STUDY	31
1.5	THE OBJECTIVES OF THE STUDY	32
1.6	DESCRIPTION OF THE STUDY AREA	33

2.	MATERIALS AND METHODS	39
2.1.0	MONITORING OF SOIL AND VEGETATION	39
2.1.1	Remote Sensing Studies	39
2.1.1.1	Data Products	39
2.1.1.2	Other Data Inputs	41
2.1.1.3	Interpretation	41
2.1.1.4	Digital Analysis	42
2.1.2	Field Studies	43
2.1.2.1	Ground Truth Survey	43
2.1.2.2	Soil and Plant Analysis	43
2.1.2.3	Vegetational Survey	44
2.1.2.4	Agronomical Studies in the Field	45
2.2	LABORATORY EXPERIMENTS	46
3.	RESULTS	52
3.1.1	Visual Interpretation	52
3.1.1.1	Selection of the Season and Suitable Data Products for the Study	52
3.1.1.2	Assessment of Saline Soil	52
3.1.1.3	Vegetational Status in the Degraded Soil	82
3.1.2	Digital Analysis	82
3.1.2.1	Salinity	82
3.1.2.2	Vegetation	86
3.2	FIELD STUDIES	100
3.2.1	Chemical Characteristics of the Soil	100
3.2.2	Productivity in Saline Soils	109
3.2.2.1	Crop Cultivated and their Yield as affected by Salinity	109
3.2.2.2	Weeds in the Rice Field	116
3.2.3	Ionic Status of Plants	138

91

3.3	LABORATORY STUDIES	142
3.3.1	Growth and Yield as Affected by Salinity	142
3.3.1.1	Mortality Rate of Rice Cultivars under Different Saline Levels	142
3.3.1.2	Growth of Rice Cultivars under Different Saline Levels	142
3.3.1.3	Yield and Yield Attributes	164
3.3.2.4	Pigments as Affected by Salinity	169
3.3.3	Ionic Accumulation	174
4.	DISCUSSION	185
4.1	Remote Sensing in Agroecosystem	185
4.2	Salinity Detection in the Agroecosystem	186
4.3	Saline Mapping at Microlevel	192
4.4	Vegetational Status in Saline Lands	194
4.4.1	Remote Sensing	194
4.4.2	Crop Studies	196
4.4.3	Phytosociological Studies of Weeds	202
4.5	Reclamation of Saline Soils	205
4.6	Epilogue	207
	SUMMARY AND CONCLUSION	210
	BIBLIOGRAPHY	216
