

Acknowledgements

During the course of my thesis project, innumerable people have helped me, academically and socially. It is these to whom I extend a 'blanket' gratitude for all they have done for me.

First and foremost I thank Dr. L.S. Chamyal, my supervisor for introducing me to Quaternary geology, before which I was more in touch with Mesozoic geology. He was also instrumental in increasing my interests in the Mainland Gujarat deposits of the Sabarmati and Mahi basins and particularly for directing my attention to the intriguing calcretes developed in them. Without his supervision, encouragement and patient guidance throughout the project, this work would not have taken shape at all.

This work would not have achieved pace but for the support of Prof. M.P. Patel, who headed the Department during a major period of this work. I also thank Prof N.D. Deasi, Head, Department of Geology for extending the facilities of the institute to me.

If I were to acknowledge Prof. Merh or 'Professor' as he is fondly addressed in our circles for all the things he has done for me, I would inevitably end up forming yet another chapter. Quite a few ideas were conceived through heated discussions during serene evenings at 7, Yoginagar. I thank him for his constant encouragement and advise throughout this project.

I thank the Council for Scientific and Industrial Research (New Delhi) for providing financial support through a 3 year Senior Research Fellowship.

Prof. S.K. Tandon (New Delhi), was yet another constant source of inspiration. I thank him for helping me, particularly in the initial stages when he allowed access to his reprint collection on calcretes which saved a lot of my time. A similar assistance by Prof. A.K. Singhvi (Ahmedabad) also helped quite a lot. My interactions with Prof. S.N. Rajaguru (Pune) and Prof. B. Parkash (Roorkee) were invaluable and helped mould my theories on calcretes and soils.

Dr. R. Ramesh (PRL, Ahmedabad) kindly provided access to the stable isotope lab at PRL where the analyses on calcretes was carried out. I would like to express my gratitude to Dr. T.K. Gundu Rao (RSIC, IIT, Powai) for extending his lab facilities (ESR & FT-IR) and also for training me in ESR spectroscopy. Prof. V.C. Thakur (WIHG, Dehra Dun) made it possible for me to complete my chemical and mineralogical studies for which I thank him.

I would like to extend a special thanks to Dr. R.V. Karanth allowing me endless hours on his computer where most of the text was entered and data plotted. I shall fondly remember the frequent afternoon excursions to his house for a quick dosa or uttapa.

My interactions with Dr. Sant and Dr. Krishnan (Archaeology Department) helped clarify my doubts on the southwest Indian monsoon and the archaeological record of Gujarat respectively.

Javed fondly called 'Mia' I shall never forgive for christening me 'Munna'! A major portion of the fieldwork in the Mahi basin was jointly carried out with him. Though he does not know, he's taught me a lot of things passively; for example to be meticulous and methodical. I thank him for being such a good friend all these years. I thank George for his invaluable friendship, hot discussions on spectroscopy, calcretes etc. (we discussed a lot of topics) and for inducting me into and teaching me FT-IR spectroscopy and more importantly for making this tenure at Vadodara a memorable experience

My other colleagues at the Department also helped in their own special ways. I thank Parag for willingly accompanying me during the field work in the Sabarmati basin. The work would not have been possible without his support. I am grateful to the help and companionship given by Manish, Sridhar, Rachna, Pinaki, Deepak, Jignesh & Sanjay during various stages of this work.

Many friends outside this department have helped me immensely. I thank Ratan, Jyoti, Debu, Anil and Sushma (all at PRL, Ahmedabad), Mayank (New Delhi) and Kajal (Vadodara) for their help and discussions.

Again many friends outside the world of geology contributed by making my evenings more meaningful. I thank Rajiv, Bahumeet, Deepak, Dhiru, Manu, Ashutosh, Sajith, Kunjan, Sharath and Pavan (the caption styles are an outcome of his suggestions) for everything they have done for me.

Aniruddha
