

List of Tables

Table No.	Title	Page No.
1.1	Values of S for various types of catchments	9
3.1	Sources of Data	36
3.2	Characteristics of Satellite Imageries Considered	36
4.1	LULC Classification Scheme used in the Study Area	44
4.2	Seasonal rainfall limits for AMC classes (SCS, 1972)	57
4.3	Land Use Categories and Associated Curve Numbers	58
4.4	Runoff Curve Numbers for Hydrologic Soil Cover Complexes	58
4.5	Sample of data showing Shorter Duration Rainfalls	62
5.1	Areas of different LULC classes for 1977	66
5.2	Areas of different LULC classes for 1988	67
5.3	Areas of different LULC classes for 1993	68
5.4	Areas of different LULC classes for 1998	69
5.5	Areas of different LULC classes for 2003	70
5.6	Areas of different LULC classes for 2008	71
5.7	Areas of different LULC classes for 2013	72
5.8	Areas of different LULC classes for 2018	73
5.9	Areas and Percentage of LULC classes in Vadodara City, 1977 – 2018 (Decadal)	74
5.10	Areas/Percentage of LULC classes with Intermediate years	82
5.11	Calculation of Land Consumption Rate (L.C.R.)	85
5.12	Calculation of Population Density	85
5.13	Calculation of Urbanness	86
5.14	Calculation of Urban Expansion Index (UEI)	86
5.15	Calculations of Landscape Expansion Index (LEI)	86
5.16	Calculations of Average Annual Urban Expansion Rate (AUER)	87
5.17	Urban Growth Coefficient (UGC)	87
5.18	Calculations of Urban Expansion Intensity Index (UEII)	87
5.19	Calculations of Urban Expansion Differentiation Index (UEDII)	88
5.19(a)	Distribution of wards in the city and growth direction	89
5.20	Decadal Analysis of rainy days from 1961 – 2018	91
5.21	MK Trend Test & Sen's Slope Estimator for Rainfall data	94
5.22	Rainfall Variability over different decades	97
5.23	Number of Excess and Deficit rainfall years 1961-2018	97
5.24	CN values for LULC Classes (CN – II)	99
5.25	Weighted CN for the year 1977	99
5.26	Weighted CN for the year 1988	100

5.27	Weighted CN for the year 1998	100
5.28	Weighted CN for the year 2008	100
5.29	Weighted CN for the year 2018	100
5.30	Decadal Total Rainfall – Runoff	104
5.31	Decade-wise analysis of rainfall and runoff	105
5.32	Changes in CN values based on change in LULC classes for base map of 1977	106
5.33	Maximum five rainfall – runoff events, Base Year 1977	106
5.34	Changes in CN values based on change in LULC classes for base map of 1988	107
5.35	Maximum five rainfall – runoff events taking base year 1988	108
5.36	Changes in CN values based on change in LU/LC classes for base map of 1998	109
5.37	Maximum five rainfall – runoff events taking base year 1998	109
5.38	Five maximum daily rainfall events and LULC of 1977 and Runoff against various LULC	110
5.39	Five maximum daily rainfall events and LULC of 1988 and Runoff against various LULC of study years	111
5.40	Five maximum daily rainfall events and LULC of 1998 and Runoff against various LULC of study years	112
5.41	Five maximum daily rainfall events and LULC of 2008 and Runoff against various LULC of study years	113
5.42	Five maximum daily rainfall events and LULC of 2018 and Runoff against various LULC of study years	114
5.43	Rainfall Intensity in mm/hr. at various rainfall durations and return periods for Vadodara station by Gumbel's Extreme Value Distribution	115
5.44	The parameters of Sherman equations	116
5.45	Constant parameters with empirical equations at Vadodara station with 100 years return period	117
5.46	Constants obtained using linear model	118
5.47	Runoff Intensity in mm/hr. at various durations and return periods	118
5.48	LULC classes of the study years	119
5.49	Developed equations for various model for Total Area estimation	121
5.50	Calculations of Total Areas using various models	121
5.51	Predicted total LULC for the Total Areas	122
5.52	Developed equations for various model for Waterbodies estimation	123
5.53	Calculations of Waterbodies using various models	124

5.54	Predicted total LULC for the Waterbodies	124
5.55	Developed equations for various model for Natural Vegetation estimation	126
5.56	Calculations of Natural vegetation using various models	126
5.57	Predicted total LULC for the Natural Vegetation	126
5.58	Developed equations for various model for Urban Settlement estimation	128
5.59	Calculations of Urban Settlement using various models	128
5.60	Predicted total LULC for the Urban Settlement	129
