

## List of Tables

Table No.	Title	Page No.
Table 1	According to the manufacturer's instruction, each reaction mix was prepared with the following composition.	28
Table 2	Program of thermal cycler conditions used in Eppendorf Mastercycler machine.	28
Table 3	List of the primers used for the study.	29
Table 4	Reaction master mix and lists of all the kit components.	29
Table 5	The thermal cycling conditions.	30
Table 6	Prepared working PureLink DNase.	63
Table 7	Hybridization master mix.	65
Table 8	Hybridization using the following thermocycling conditions.	65
Table 9	Depletion master mix.	65
Table 10	DNase digestion master mix.	66
Table 11	1 <sup>st</sup> strand synthesis master mix.	67
Table 12	1 <sup>st</sup> strand synthesis using the following thermocycling conditions.	67
Table 13	2 <sup>nd</sup> strand synthesis and A-tailing master mix.	67
Table 14	2 <sup>nd</sup> strand synthesis and A-tailing using the following thermocycling profile.	67
Table 15	Adapter ligation master mix.	68
Table 16	Library amplification master mix.	69
Table 17	Amplified the library using the following thermocycling profile.	69
Table 18	Highest upregulated genes in the <i>TRIM34</i> Knockout sample.	78
Table 19	Highest downregulated genes in the <i>TRIM34</i> Knockout sample.	78
Table 20	Top 10 differential genes in network String interactions ranked by degree ranking method.	80
Table 21	Upregulated ubiquitin pathway genes identified by GO analysis in the <i>TRIM34</i> knockout sample.	91
Table 22	Downregulated ubiquitin pathway genes identified by GO analysis in the <i>TRIM34</i> knockout sample.	92
Table 23	List of the primers used for the study.	103
Table 24	PCR thermal cycling conditions.	103
