

LIST OF FIGURES

Figure		Page
1.	Growth curves of progeny of mothers fed diets consumed by different population groups; Mean Body Weights.	178
2.	Growth curves of progeny of mothers fed diets consumed by different population groups; Total Body Weights.	179
3.	Growth curves of Rats subjects to variations in dietary protein content and to changes in the same.	221
4.	Growth of Rats fed on a Wheat diet with or without addition of Lysine at different ages.	250
5.	Growth of Rats fed on a Wheat diet with and without addition of Lysine from weaning onwards.	251
6.	Effect of age on composition of Femur in Rats fed a standard diet providing 440 mg Ca throughout.	280
7.	Growth of Rats fed Vitamin A or Carotene in early life and repleted (23-26 weeks) with Carotene after an intervening period of depletion (11-23 weeks).	289
8.	Scatter gram for increments in Serum Vitamin A or Carotene prior to depletion.	293
