

ACKNOWLEDGEMENT

The research work incorporated in this Thesis on "Some Contributions to Acceptance Sampling and Simulation" is the work done by me for the Ph.D. degree of the Maharaja Sayajirao University of Baroda, under the guidance of Dr. N.M. Bhatt, the former Professor and Head of the Department of Statistics of the M.S. University of Baroda, during the period 1966 to 1969. I very gratefully acknowledge the help and guidance received to me from Dr. N.M. Bhatt in the preparation of this thesis and I specially thank him for very kindly continuing his help and guidance even after his retirement from the M.S. University of Baroda on 27th March, 1969 and seeing through the submission of the thesis in June 1969.

I thank Professor M.C. Chakrabarti, Head, Department of Statistics, University of Bombay for encouragement during the progress of this work.

My grateful thanks are due to Professor Indira V. Bhanot, the present Head of the Department of Statistics of the M.S. University of Baroda, Dr. N.S. Pandya, Dean of the Faculty of Science of the M.S. University of Baroda and the authorities of the M.S. University of Baroda for their help in finding the expenses for the computational work of Chapter VII. I also thank Shri D.V.N. Sarma, Director of the Operations Research Group in Sarabhai Group, Baroda and members of his staff for carrying out the computational work mentioned above on the 1401 Computer, inspite of heavy work load in the Computer Section.

I received help from many others, I take this opportunity to thank them all.

Baroda,
June, 1969.

A.G. Phatak
