

ACKNOWLEDGEMENT

Inadequate though these words are, I am greatly beholden to Dr. P.M. Ambadkar, Professor and Head, Department of Zoology, Faculty of Science, M.S. University of Baroda, for heralding me into the field of research. His innovative guidance, invaluable suggestions and constructive criticism apart from the devotion of a great deal of his valuable time have contributed greatly to the successful completion of the study.

I am thankful to Dr. D.M. Vyas for introducing me to the subject during initial stages. I am also thankful to Dr. N.F. Gangaramani for her unfailing encouragement and for providing strong motivational force all throughout the present study. I would be failing in my duties if I do not express my sincere thanks to Dr. R.V. Nene for enhancing my interest in the field of research.

Thanks are also due to Geeta, Smruti, John & Paul for their help during the course of this study.

I gratefully acknowledge the financial support from University Grants Commission by way of award of junior research fellowship.

Last but not least, I am grateful to my wife, Anuradha, for her moral support to me towards fulfillment of the study.
