

CONTENTS

CHAPTER		PAGE
	INTRODUCTION	1
1	Influence of isoproterenol administration on patterns of steroid dehydrogenases in liver and kidney of male rat.	18
2	Involvement of β -adrenergic agonist in regulation of lipogenesis in the preputial gland of rat.	42
3	Action of chronic isoproterenol administration on certain dehydrogenases in the preputial gland of male albino rat.	57
4	Effect of isoproterenol administration on activities of LDH and MDH in the preputial gland.	68
5	Neuroendocrine regulation of certain metabolic features of the rat preputial gland.	79
6	Influence of neuroendocrine manipulations on the activities of certain hydrolytic enzymes in the rat preputial gland.	93
7	A study of certain neuroendocrine manipulations on cyclic AMP phosphodiesterase levels in the rat preputial gland.	107
8	Responses exhibited by the rat preputial gland protein metabolism towards certain neuroendocrine manipulations.	115
	GENERAL CONSIDERATIONS	129
	BIBLIOGRAPHY	141
