<u>CHAPTER I</u>	INTRODUCTION	1
	References	5
<u>CHAPTER II</u>	EFFECTIVE INTERACTIONS	
II.0	Introduction	6
II.1	The origin of density dependence in effective interactions in nuclei	7
II.1.1	The Skyrme interaction	10
II.1.2	Significance of various parameters of Skyrme interaction	13
II.2	Relation between Skyrme force and realistic forces	14
II.3	Variants of the Skyrme interaction	16
II.3.1	Interrelationship of Skyrme parameters	19
II.4	Some limitations of Skyrme interaction	23
II.4.1	Calculations for nuclear matter	23
II.4.2	Density dependent two-body versus three-body δ -interactions	24
II.5	Pairing in Skyrme interaction	25
II.6	A note on Sussex interaction	29
II.7	Summary	32
	References	34

<u>CHAPTER III</u> HARTREE-FOCK FORMALISM AND CENTRE-OF-MASS MOTION.	
III.0 Introduction	36
III.1 Hartree-Fock formalism	38
III.1.1 Alternative expression for HF equations	43
III.1.2 Single particle separation energies	44
III.2 Centre-of-mass motion and single particle separation energies	45
III.2.1 c.m.m. and two forms of the Hamiltonian	47
III.2.2 Single particle energies and separation energies	50
III.2.3 Calculation for ^{16}O using the two forms of the Hamiltonian	51
III.3 HF calculations with density independent Skyrme interaction	53
III.3.1 Sensitivity of the calculation on the Oscillator parameter b	53
III.3.2 Results and discussion	54
References	57
<u>CHAPTER IV</u> DENSITY DEPENDENT SKYRME INTERACTION IN THE HARTREE-FOCK FORMALISM.	
IV.0 Introduction	73
IV.1 Definition of band averaged density	77
IV.2 Density dependent Hartree-Fock theory	81
IV.2.1 Rearrangement energy	85

CHAPTER IV

IV.2.2	HF single particle energies and separation energies	86
IV.3	HF calculations with the band averaged Skyrme interaction	91
IV.4	Summary	92
	References	94

CHAPTER V HARTREE-FOCK PROJECTED SPECTRA

V.0	Introduction	102
V.1	Projection of good angular momentum states	103
V.1.1	Orthonormalization of the projected states belonging to different bands	107
V.1.2	Calculation of electromagnetic properties with projected wave functions	109
V.1.3	An outline of self-consistent cranking model	111
V.1.4	An outline of alpha-cluster model of the nucleus	112
V.2	Spectra of some $A=8$ nuclei with i) density independent Skyrme and ii) Sussex interaction	113
V.3	Role of two-body spin-orbit interaction in the structure of ^{12}C	120

CHAPTER V

V.3.1	Comparison with alpha-cluster model	126
V.4	Spectroscopy with band averaged density dependent interaction	130
V.4.1	Spectra of ^{20}Ne	136
V.5	Individual contributions of various parts of Skyrme interaction to nuclear spectra	140
V.6	Summary	143
	References	145

CHAPTER VI	CONCLUSIONS	148
	APPENDIX A	151
	APPENDIX B	152
	APPENDIX C	157
	APPENDIX D	159
