	List of Figures	
	List of Plates	
1.	Introduction <ul style="list-style-type: none"> • Justification • Objectives of the Study • Delimitations of the study • Hypotheses of the Study 	1 to 10
2.	Review of Literature <ul style="list-style-type: none"> • Physiological decline in the elderly • Functional limitation and disabilities found in third age • Anthropometry of people in third age • Posture • Designing for comfort • Storage for the normal people and the people in third age • Lighting for elderly • Conclusion 	11 to 47
3.	Methodology <ul style="list-style-type: none"> • Research design • Conceptual frame work of the study • Variables under study • Operational definition • Tool for data collection • Selection of sample • Method of data collection • Analysis of data • Educational Programme on Ergonomically appropriate storage design for the People in Third Age 	48 to 96

4.	Result and Discussion <ul style="list-style-type: none"> • Demographic information of the women in the third age • Health status including frequency of activities performed by the respondents • Anthropometric and reach measurements of the respondents • Existing storage facilities in kitchen and bedroom • Extent of Problems experienced with existing storage units in selected areas. • Level of satisfaction of the respondents with the existing storage units • Testing of hypotheses • Suggested ergonomically appropriate guidelines for storage design 	397 to 398
5.	Summary and Conclusion Summary Conclusion Implications Recommendations	396 to 416
