

List of Figures

FIG. 1.1: LOCATION MAP OF KACHCHH.....	7
FIG. 1.2: MAJOR FAULTS AND UPLIFTS OF KACHCHH REGION. (INCORPORATED FROM BILHAM, 1999; BISWAS AND DESHPANDE, 1983; MANDAL ET AL. 2004, MORINO ET AL. 2008A, MALIK ET AL. 2008B)	8
FIG. 1.3: PHYSIOGRAPHIC MAP OF KACHCHH.	8
FIG. 1.4: RIFT SYSTEM OF WESTERN INDIA AND PRECAMBRIAN TRENDS IN GUJARAT (AFTER BISWAS 2005).....	10
FIG. 1.5: GEOLOGICAL MAP OF GUJARAT (AFTER MERH, 1995).	10
FIG. 1.6: EPICENTERS OF HISTORICAL (NON-INSTRUMENTAL) AND MODERN (INSTRUMENTAL) SEISMICITY IN KACHCHH FROM 1668 TO 2008; COMPILED FROM DIFFERENT SOURCES (SEE TABLE 5.1).	15
FIG. 2.1: GEOLOGIC CROSS SECTION ACROSS KATROL HILL FAULT, REDRAWN AFTER HARDAS, 1968.....	21
FIG. 3.1: SIND BLOCK AS PROPOSED BY STEIN ET AL. 2002.....	32
FIG. 3.2: GEOLOGICAL CROSS SECTION ACROSS KACHCHH BASIN (AFTER BISWAS 1987).	33
FIG. 3.3: GEOLOGICAL CROSS SECTION ACROSS KACHCHH BASIN (AFTER BISWAS 2005).	33
FIG. 3.4: SIMPLIFIED GEOLOGICAL MAP OF KACHCHH REGION. (MODIFIED AFTER KARANTH AND GADHAVI 2007).	37
FIG. 3.5: FIELD PHOTOS OF CURRENT BEDDED BHUJ SANDSTONE.	41
FIG. 3.6: SATELLITE IMAGE OF FOLDED LAVA FLOWS SOUTH OF ANJAR.....	43
FIG. 3.7: INTRUSIVE PLUG SOUTH OF KAS HILL RANGE AS SEEN ON LISS-PAN MERGED SATELLITE DATA DRAPED OVER SRTM ELEVATION DATA.	43
FIG. 3.8: DYKES AND SILLS INTRUDED IN LOWER JURASSIC ROCKS OF PACHHAM ISLAND (NIR WANDH).....	45
FIG. 3.9: BHANJDA HILL IGNEOUS INTRUSION; WEST OF KHADIR ISLAND.	45
FIG. 3.10: TERTIARY LIMESTONE EXPOSURE IN WESTERN KACHCHH.	49
FIG. 3.11: INCLINED MILIOLITE LAYERS ATOP HABO HILL, NORTHERN HILL RANGE.	50
FIG. 3.12: RANN SURFACE TORN BY BLISTERING WIND.	51
FIG. 3.13: KACHCHH REGION DURING A.D. 712 AS POSTULATED BY SIVEWRIGHT (1907) BASED ON ACCOUNT OF ARAB HISTORIANS.	53
FIG. 3.14: ARCHAEOLOGICAL SITES WITHIN AND AROUND GREAT RANN OF KACHCHH.	53
FIG. 4.1: STRUCTURAL MAP OF KACHCHH REGION (MODIFIED AFTER BISWAS AND DESHPANDE, 1983).....	58
FIG. 4.2: FIELD PHOTO OF KAKARWA ANTICLINE. AXIAL PORTION ALONG WITH CORE PART OF ANTICLINE IS ERODED; SOUTH VERGING FORELIMB AND GENTLY NORTH DIPPING BACK LIMB ARE PRESERVED.	61
FIG. 4.3: GOOGLE IMAGE OF MEMAN WANDH STRUCTURAL BASIN.	61
FIG. 4.4: LISS-PAN MERGED FCC SATELLITE IMAGE DEPICTING MAE AND VAMKA DOMES ALONG SOUTH WAGAD FAULT ZONE.	62
FIG. 4.5: ELEVATION PROFILE ALONG X-Y; ACROSS VAMKA DOME. BEDDING IS IMITATED OVER IT.....	62
FIG. 4.6: OVERTURNED BEDS OF JURASSIC AGE AS OBSERVED SOUTH OF ADHOI ANTICLINE. (VIEW TOWARDS EAST).	62
FIG. 4.7: SHEARED AND FOLDED TERTIARY ROCKS AT ADHOI (VIEW TOWARDS WEST).	63
FIG. 4.8: SURFACE OF MARDAK BET (LITTLE RANN OF KACHCHH) COVERED WITH QUARTZ AND AGATE.	64
FIG. 4.9: GOOGLE IMAGE OF DOMAL STRUCTURES AND STEEPER SOUTH DIPPING BEDS OF SANDSTONE AT MARDAK BET, LITTLE RANN OF KACHCHH.....	64
FIG. 4.10: STRUCTURAL MAP OF GEDI FAULT ZONE NEAR DESALPAR VILLAGE.	67
FIG. 4.11: STEEPLY SOUTH DIPPING BEDS NEAR DESALPAR VILLAGE (GEDI FAULT).	67
FIG. 4.12: NORTH DIPPING BEDS NORTH OF KALADONGAR HILL (VIEW TO WEST).	69
FIG. 4.13: RECUMBENT FOLD OBSERVED NEAR JUNA, GORADONGAR HILL, PACHHAM (VIEW TO EAST).	69
FIG. 4.14: STEEPLY NORTH DIPPING/SUBVERTICAL BEDS OBSERVED AT NORTHERN BOUNDARY OF KAS HILL DOME (LOTHIA NALA). .	71
FIG. 4.15: OVER TURNED BEDS NORTH OF LOTHIA-NALA DAM DOME, KAS HILL ANTICLINE (VIEW TO EAST).	71
FIG. 4.16: FOLDED TERTIARY ROCKS OBSERVED AT KHAROD RIDGE, BANNI.	74
FIG. 4.17: DOMAL EXPOSURES OF TERTIARY ROCKS IN BANNI, NEAR SRAVAN SHRINE, NORTH OF JAWAHARNAGAR.	74
FIG. 4.18: SHEARED ROCKS IN CORE OF KATROL HILL.	76
FIG. 4.19: DRAG FOLDS DEVELOPED IN SHALE (LESS COMPETENT) BEDS SANDWICHED BETWEEN SANDSTONE (MORE COMPETENT) BEDS OBSERVED IN KATROL HILL, 8 KM SOUTH OF BHUJ (PORTION SHOWN IN BOX IS ENLARGED BELOW).	76
FIG. 4.20: GEOLOGY OF KAKARWA ANTICLINE; NOTE VERY THIN OUTCROP OF JURASSIC ROCKS AT SOUTHERN MARGIN OF THE STRUCTURE.	78
FIG. 4.21: OVERTURNED JURASSIC BEDS RESTING OVER GENTLY SOUTH DIPPING CRETACEOUS SANDSTONE.....	78
FIG. 4.22: SUB-HORIZONTAL THRUST OBSERVED NEAR GEOMORPHIC BOUNDARY BETWEEN KATROL HILL RANGE AND BHUJ LOW.	79
FIG. 4.23: LOW ANGLE REVERSE FAULTS OBSERVED AT (A) TRAMBOU AND (B) SARASPAR.....	80
FIG. 4.24: STRUCTURAL FEATURES OF PALARA SYNCLINE, BHUJ.	82
FIG. 4.25: PHOTO MOSAIC OF SARASPAR THRUST.	83

FIG. 4.26: SOUTHERN MARGIN OF PALARA SYNCLINE; OBSERVE STEEPLY NORTH DIPPING BEDS ABUTING AGAINST SUB-HORIZONTAL BEDS.	83
FIG. 4.27: BEDDING CONFINED INCLINED JOINTS.....	84
FIG. 4.28: FLAT-RAMP-FLAT STRUCTURE OBSERVED WITHIN PALARA SYNCLINE.	84
FIG. 4.29: OPPOSITE SENSE OF RELATIVE DISPLACEMENTS IN THIN INCOMPETENT SHALE LAYERS ON EITHER SIDE OF A SANDSTONE BED; PORTIONS SHOWN IN THE RECTANGLES ARE ENLARGED BELOW (A-LEFT; B-RIGHT).....	85
FIG. 5.1: LIQUEFACTION CRATER SEEN IN EPICENTRAL AREA OF 2001 BHUJ EARTHQUAKE.	91
FIG. 5.2: LOCATION MAP OF TRENCH EXCAVATION ALONG THE KACHCHH MAINLAND FAULT. LOCATIONS OF THE TWO TRENCHES ARE SHOWN AS T1 AND T2, WHICH CAN BE SEEN IN FIG 5.5 AND FIG 5.7 RESPECTIVELY.	94
FIG. 5.3: ELEVATION PROFILE ACROSS TRACE OF ACTIVE KMF EXTRACTED FROM SRTM DATA (FOR LOCATION SEE X-Y IN FIG. 5.4).	95
FIG. 5.4: MORPHOLOGY AROUND JHURA TRENCH (T1), UPLIFTED FAN DEPOSITS WERE OBSERVED TO THE SOUTH OF NW-SE STRIKING DEGRADED SCARP, X-Y INDICATE END-POINTS OF ELEVATION PROFILE (FIG. 5.3), SEE FIG. 5.2 FOR LOCATION.	96
FIG. 5.5: TRENCH LOG OF WESTERN WALL OF TRENCH T1 EXCAVATED NEAR JHURA VILLAGE ACROSS TRACE OF ACTIVE KMF.	96
FIG. 5.6: GEOMORPHOLOGY AROUND TRENCH T2 (KHIRSARA TRENCH).	102
FIG. 5.7: PHOTOGRAPH OF KHIRSARA TRENCH DEPICTING DISPLACEMENT OF QUATERNARY UNITS.	102
FIG. 5.8: PHOTOGRAPH OF KHIRSARA TRENCH DEPICTING DEFORMATION OF QUATERNARY UNITS. (ARROWS POINT TO FAULT PLANE).	103
FIG. 5.9: PAIRED VALLEY FILLED ALLUVIAL TERRACES (SHOWN IN ARROWS) IN KHARI RIVER. (SEE FIG. 4.24 FOR LOCATION).	105
FIG. 5.10: PALEOCHANNEL OBSERVED ALONG EASTERN BANK OF KHARI RIVER AT WESTERN FRINGE OF PALARA SYNCLINE. (SEE FIG. 4.24 FOR LOCATION).	106
FIG. 5.11: STRATH TERRACES ALONG PAT RIVER. (SEE FIG. 4.24 FOR LOCATION).....	107
FIG. 5.12: AGGRADATION OBSERVED ALONG THE PAT RIVER. (SEE FIG. 4.24 FOR LOCATION).	108
FIG. 5.13: WATER LOGGING ALONG THE PAT RIVER. (SEE FIG. 4.24 FOR LOCATION).	108
FIG. 5.14: BEDROCK INCISION SOUTH OF SARASPAR THRUSH. (SEE FIG. 4.24 FOR LOCATION).....	109
FIG. 6.1: GEOLOGICAL SECTION ACROSS KUTCH RIFT ACROSS WAGAD UPLIFT AND KACHCHH MAINLAND UPLIFT AS POSTULATED BY BISWAS 2005.	112
FIG. 6.2: GENERALIZED CROSS-SECTION FROM SOUTH TO NORTH OF THE FOLD-AND-THRUST BELTS OF KACHCHH.	116
FIG. 6.3: IDEALISED BLOCK DIAGRAM SHOWING THE DEVELOPMENT OF A DRAPE FOLD ON ALLUVIAL-FAN ON BURIED NORMAL FAULT. (AFTER KELLER AND PINTER, 2002).	117
FIG. 6.4: PHASES OF FAULT-PROPAGATION FOLD DEVELOPMENT AS A RESULT OF SLIP ALONG A DETACHMENT FAULT. NOTE THAT WITH PROGRESSIVE SLIP ON DETACHMENT FAULT, FOLD BECOMES MORE ASYMMETRIC AND GROWS DIMENSION. (MODIFIED AFTER KELLER AND PINTER, 2002).	118
FIG. 6.5: GEOLOGICAL MAP OF THE AREA AROUND JAWAHARNAGAER (ABOVE); CROSS SECTION ALONG X-Y (BELOW). (AFTER KARANTH AND GADHAVI 2007).	119
FIG. 6.6: LISS-PAN MERGED SATELLITE IMAGE OF KAS HILL CLIFF. THE LINEAMENT ON THE BACK SIDE OF CLIFF INDICATES BENDING MOVEMENT FAULT.	120
FIG. 6.7: FIG. 6.7: A CARICATURE OF THE NATURE OF FAULT-PROPAGATION FOLDING AT KAS HILL, ALONG KACHCHH MAINLAND FAULT. (MODIFIED AFTER KARANTH 2003).	120
FIG. 6.8: SLIP DEFICIT ON SUBSURFACE FAULT, REFLECTED AS SADDLE IN FOLD ON THE SURFACE. (REDRAWN AFTER BURBANK AND ANDERSON, 2001).	122
FIG. 6.9: FAULT GROWTH BY SEGMENT LINKAGE. (REDRAWN AFTER BURBANK AND ANDERSON, 2001).	123
FIG. 6.10: OUT-OF-SYNCLINE THRUST PROPAGATING ON THE GENTLY DIPPING LIMB. (AFTER MITRA 2002).....	124
FIG. 6.11: FLEXURAL SLIP FOLDING AT SARASPAR THRUST..	126
FIG. 6.12: WEDGE THRUST SEEN ALONG NORTHERN MARGIN OF PALARA SYNCLINE.	126
FIG. 6.13: FLAT-RAMP-FLAT STRUCTURE OBSERVED WITHIN PALARA SYNCLINE.	127
FIG. 6.14: SCHEMATIC DIAGRAM TO DEMONSTRATE NET-SLIP CONSIDERING FAULT DRAG OF SUBUNIT 3C ALONG EASTERN WALL OF TRENCH T1 (SEE FIG. 5.5).	132
FIG. 6.15: SCHEMATIC ILLUSTRATION OF CHARACTERISTIC EARTHQUAKE DISPLACEMENTS VERSUS UNPREDICTABLE, VARIABLE SLIP (AFTER BARBANK AND ANDERSON, 2001).	135
FIG. 6.16: ACTIVE FAULT MAP OF KACHCHH PREPARED BASED ON PALAEOSEISMIC AND ACTIVE FAULT STUDIES; AS WELL AS RECENT SEISMIC DATA OF THE REGION.	137
FIG. 6.17: STRUCTURAL MAP OF KHAROD REGION (SEE TREND OF PROPOSED KHAROD FAULT).	138
FIG. 6.18: AN EXPOSURE SCALE SPLAY OBSERVED NEAR JADURA.	138
FIG. 6.19: GEOMETRY OF A DIVERGING SPLAY (MODIFIED AFTER GHOSH, 1993).	139
FIG. 6.20: GEOMETRY OF A REJOINING SPLAY (MODIFIED AFTER GHOSH, 1993; FIG. 18.19, p441).....	139
FIG. 6.21: STRUCTURAL SEGMENTS OF KMF SHOWN AS A, B AND C.	143
