

C O N T E N T S

	<u>Page</u>
<u>Chapter I : INTRODUCTION</u>	1
<u>Location</u>	1
<u>Physiography and drainage</u>	1
<u>Climate and rainfall</u>	4
<u>Fauna and flora</u>	4
<u>Habitation</u>	5
<u>Transport and communication</u>	6
<u>Purpose and scope of investigation</u>	6
<u>Brief geology</u>	8
 <u>Chapter II : PREVIOUS WORK</u>	 10
<u>Kumaon Himalaya in general</u>	10
<u>Previous work on Almora area</u>	31
 <u>Chapter III : GEOLOGICAL SETTING</u>	 38
<u>Introduction</u>	38
<u>Rock types</u>	40
<u>Distribution</u>	47
Mica-schists	47
Granitised rocks	51
Flaggy quartzites	54
Calc-silicate rocks	56
Quartz veins	56

<u>Chapter IV : STRUCTURAL GEOLOGY</u>	57
<u>Structural pattern</u>	57
Major structures	61
Minor structures	64
<u>Structural elements related to various episodes</u>	68
Minor structures related to the load	70
Minor structures related to the F_1 folding	70
Minor structures related to the F_2 folding	74
Minor structures related to the F_3 folding	76
<u>Structural analysis</u>	77
<u>Structural synthesis</u>	108
<u>Joint pattern</u>	121
<u>Discussion</u>	123
<u>Chapter V : PETROGRAPHY</u>	128
<u>Main types</u>	128
<u>Mica-schists</u>	129
Uncrinkled garnet mica-schists	131
Crinkled garnet mica-schists	139
Quartzose mica-schists	143
Graphitic schists	147

<u>Gneisses and gneissic granites</u>	150
Gneissic rocks from the smaller lensoid bands at Sainar, Phalsimi, Bintola, Gajaul, Sheora and Kasaun villages	150
Gneissic rocks from the Chaunsali band in the SW	153
Gneissic granite mass of Dyolidanda hill	161
<u>Flaggy quartzite</u>	174
White muscovite bearing quartzites	174
Grey biotite quartzite	175
<u>Calc-silicate rocks</u>	177
 <u>Chapter VI : METAMORPHISM</u>	 180
<u>General</u>	180
<u>Metamorphic event I</u>	182
<u>Metamorphic event II</u>	183
<u>Metamorphic event III</u>	192
<u>Metamorphic event IV</u>	193
<u>Late retrogressive changes</u>	195
 <u>Chapter VII : GRANITISATION</u>	 196
<u>General considerations</u>	196
<u>Evidences of granitisation</u>	200

Megascopic evidences	200
Microscopic evidences	202
Chemical criteria	203
<u>Mechanism and causes of granitisation</u>	220
 <u>Chapter VIII : RESUME</u>	 236
<u>Rock types and structure</u>	236
<u>Structural and metamorphic history</u>	238
<u>Granitisation</u>	241
<u>Concluding remarks</u>	243
 ACKNOWLEDGEMENTS	 245
REFERENCES	246

LIST OF FIGURES

<u>Figure</u>	<u>Title</u>	<u>Page</u>
I	Location map	2
II.1	The section across Central Himalaya (Captain Strachey)	13
II.2	Diagrammatic section across the Kashmir Himalaya showing the broad tectonic features (D.N. Wadia)	17
II.3	Tectonic section across the Garhwal Himalaya (J.B. Auden)	18
II.4	Section showing the crystalline thrust masses in the Kumaon Himalayas Almora (A. Gansser)	22

II.5	Tectonic section from Munsiri to Kali valley near Tanakpur (K.S.Valdiya)	23
II.6	Section between Bhowali and Someshwar (S.S.Merh)	25
III.1	Geological map	At the back of the thesis
III.2	Foliation trend map	
IV.1	Lineation map	
IV.2	Map showing sub-areas	
IV.3	Axial-trace map	
IV.4	Stereograms showing the structural elements of the sub-area 1	80
IV.5	Stereograms showing the structural elements of the sub-area 2.	82
IV.6	Stereograms showing the structural elements of the sub-area 3	83
IV.7	Stereograms showing the structural elements of sub-area 4.	85
IV.8	Stereograms showing the structural elements of sub-area 5	87
IV.9	Stereograms showing the structural elements of sub-area 6	89
IV.10	Stereograms showing the structural elements of sub-area 7	90
IV.11	Stereograms showing the structural elements of sub-area 8	92
IV.12	Stereograms showing the structural elements of sub-area 9	93

IV.13	Stereograms showing the structural elements of sub-area 10	95
IV.14	Stereograms showing the structural elements of sub-area 11	97
IV.15	Stereograms showing the structural elements of sub-area 12	98
IV.16	Stereograms showing the structural elements of sub-area 13	100
IV.17	Stereograms showing the structural elements of sub-area 14	101
IV.18	Stereograms showing the structural elements of sub-area 15	103
IV.19	Stereograms showing the structural elements of sub-area 16	104
IV.20	Stereograms showing the structural elements of sub-area 17	106
IV.21	Stereograms showing the structural elements of sub-area 18	107
IV.22	Collective β diagram of sub-areas 7 & 8	111
IV.23	Collective β diagram of sub-areas 8 & 9	113
IV.24	Stereogram showing the scattering of L_2 lineation	114
IV.25	Collective β diagram of sub-areas 14 & 15	119
IV.26	Map showing the joint pattern	At the back of the thesis
IV.27	Figure showing different stages of development of S_1 from S	124

VI.1	Diagram after Butler	186
VI.2	ACF diagram for mica-schists	191
VII.1	Variation diagram for the gneissic rocks of Dyolidanda hill band	204
VII.2	Variation diagram for the gneissic rocks of Chaunsali band	207
VII.3	Von Wolff's Q-L-M diagram for the gneissic rocks of Dyolidanda hill	209
VII.4	Von Wolff's Q-L-M diagram for the gneissic rocks of Chaunsali band	210
VII.5	Mehnert's graph for the gneissic rocks of Dyolidanda hill band	213
VII.6	Mehnert's graph for the gneissic rocks of Chaunsali band	213
VII.7	Hejtman's diagram for the gneissic rocks of Dyolidanda hill band	215
VII.8	Diagram based on variation in alkalies in gneissic rocks (Marmo)	217
VII.9	Diagram for synkinematic gneisses and gneissic granites of Almora area (Marmo)	218
VII.10	c/fm-al-alk diagram of Niggli	219
VII.11	C-Al-Alk diagram based on Osann's system	221
VII.12	ACF diagram for the gneissic rocks of Dyolidanda hill band (Turner)	226
VII.13	AKF diagram for the gneissic rocks of Dyolidanda hill band (Turner & Verhoogen)	227
VII.14	AKF diagram for the gneissic rocks of Chaunsali band (Turner & Verhoogen)	231
